28

INTRODUCTION

1
2 Plaintiffs brought this suit blaming immigration-driven population growth
3 for a host of environmental harms, and claiming broadly that the Department of
4 Homeland Security (“DHS”) failed to comply with the National Environmental
5 Policy Act (“NEPA”) in the “administration of immigration law and policy.” Pls.’
6 Mem. in Supp. of Mot. for Summ. J. (“Pl. Br.”) at 1, ECF No. 70-1. But, courts
7 have long recognized that NEPA challenges are a particularly unsuitable vehicle for
8 the pursuit of broad policy agendas—especially those as environmentally
9 attenuated as Plaintiffs’. *See Metro. Edison Co. v. People Against Nuclear Energy*,
10 460 U.S. 766, 777 (1983) (“The political process, and not NEPA, provides the
11 appropriate forum in which to air policy disagreements.”). This Court has already
12 dismissed Plaintiffs’ wide-ranging claims that all of DHS’s immigration-related
13 functions are conducted in violation of the statute. *See Order Granting Defs.’ Partial*
14 *Mot. to Dismiss*, ECF No. 55. The Court should now reject Plaintiffs’ request for
15 summary judgment on their remaining claims and grant Defendants’ cross-motion,
16 bringing to a close Plaintiffs’ effort to use NEPA to pursue policy goals far afield
17 from the core purposes of the statute.

18 In the wake of the Court’s prior Order, only six discrete agency actions
19 remain: the issuance of a NEPA Categorical Exclusion, the application of that
20 Categorical Exclusion to four regulations, and DHS’s NEPA evaluation of a
21 decision to construct a temporary housing facility in response to a 2014 influx of
22 children and families crossing the southwestern border without authorization.
23 Plaintiffs’ challenges to these six decisions should be rejected.

24 First, Plaintiffs’ remaining claims must be rejected for lack of standing.
25 Plaintiffs allege the broadest possible harms, asserting that decades of immigration
26 policy *writ large* has caused them a host of injuries. But this Court has dismissed
27 the only claims that could even potentially correspond to such generalized harms.
28

1 Meanwhile, Plaintiffs’ remaining claims are completely untethered to their broad
2 population-growth based harms. For example, Plaintiffs make no attempt to
3 demonstrate that the *specific* decision to construct a temporary housing facility, or
4 the few rule amendments they challenge, will actually cause them injury. Thus,
5 Plaintiffs have failed to carry their burden of demonstrating that their alleged harms
6 are “fairly traceable” to the actions before the Court.

7 Second, even if Plaintiffs had standing, several of their claims have additional
8 jurisdictional defects. Plaintiffs’ challenge to the NEPA Categorical Exclusion is
9 barred by the statute of limitations. And, Plaintiffs’ challenges to the NEPA
10 Categorical Exclusion and the Designated School Officials Rule are barred by their
11 failure to raise their concerns in the public comment process.

12 Finally, even if Plaintiffs’ could overcome these jurisdictional defects, their
13 claims would fail on the merits. The record shows that DHS followed the law and
14 applicable regulations, and drew reasoned opinions from the facts, in making the
15 challenged decisions. Plaintiffs’ attempt to leverage minor revisions of existing
16 rules and programs—where those revisions have insignificant incremental
17 environmental impacts—into a wholesale review of the environmental impact of
18 the existing rules and programs themselves, based solely on an attenuated and
19 unsupported belief that the rules indirectly cause environmental impacts, stretches
20 NEPA beyond recognition. NEPA does not require speculative analysis of highly
21 attenuated indirect effects. Nor does it require agencies to wholesale revisit long-
22 past agency decisions anytime the agency makes an environmentally insignificant
23 adjustment to a program. Such a reading of NEPA ignores the categorical exclusion
24 process created by the CEQ, and would ossify decision-making, discouraging
25 agencies from making minor—and potentially environmentally beneficial—
26 revisions to their regulations for fear of triggering an obligation to undertake a time-
27 and resource-consuming NEPA study of the entire underlying program. Plaintiffs’
28

1 attempt to so deform NEPA should be rejected, along with their remaining claims.

2 BACKGROUND

3 I. Legal Background

4 Congress enacted NEPA to establish a process through which federal
5 agencies must consider the consequences of their actions upon the environment. *See*
6 42 U.S.C. §§ 4321-4370. NEPA requires federal agencies to prepare a detailed
7 “environmental impact statement” (“EIS”) for all “major Federal actions
8 significantly affecting the quality of the human environment.” 42 U.S.C. § 4332(C).
9 An EIS must include a “detailed written statement” concerning “the environmental
10 impact of the proposed action” and “any adverse environmental effects which
11 cannot be avoided.” *Id.*; *see also* 40 C.F.R. §§ 1502.1, 1508.11.

12 NEPA also established the Council on Environmental Quality (“CEQ”). 42
13 U.S.C. § 4342. CEQ’s implementing regulations provide that in order to determine
14 whether a proposed major federal action requires preparation of an EIS, the agency
15 may conduct a preliminary examination, called an environmental assessment
16 (“EA”). 40 C.F.R. §§ 1501.4, 1508.9. The EA “serves to . . . [b]riefly provide
17 sufficient evidence and analysis” to determine whether the action will have a
18 “significant” effect on the environment. *Id.* at 1508.9. If the agency determines that
19 the effects will not be significant, it issues a “finding of no significant impact”
20 (“FONSI”) in lieu of preparing an EIS. *Id.* at 1508.13.

21 CEQ’s regulations also instruct agencies to identify classes of actions,
22 referred to as “categorical exclusions” (“CATEXs”), that normally “do not
23 individually or cumulatively have a significant effect on the human environment”
24 and are therefore excluded from the requirement of preparing an EA or an EIS. *Id.*
25 at §§ 1508.4, 1507.3(b)(2). An agency’s procedures regarding categorical
26 exclusions must “provide for extraordinary circumstances in which a normally
27 excluded action may have a significant environmental effect,” and therefore
28

1 requires preparation of an EA or EIS. *Id.* at § 1508.4. Thus, for each proposed action
2 that might fit a categorical exclusion, the agency must determine on a case-by-case
3 basis whether the proposed action triggers any extraordinary circumstances that
4 would preclude application of the category.

5 **II. Factual Background**

6 **A. Litigation Background**

7
8 Plaintiffs filed suit in October 2016, challenging DHS's compliance with
9 NEPA for a broad range of "discretionary actions" "concerning the entry and
10 settlement of multitudinous foreign nationals into the United States." ECF No. 1,
11 ¶1. Defendants moved to dismiss, arguing that most of the actions challenged were
12 not reviewable because they were moot, not final agency actions, or precluded from
13 review by statute, and because Plaintiffs failed to state a claim under NEPA. ECF
14 No. 39-1. In response, Plaintiffs filed an amended complaint. *See* ECF 40, ECF 44.

15 After reviewing Plaintiffs' amended complaint, DHS moved to dismiss two
16 of Plaintiffs' five claims; Count I, which sought review of an internal agency
17 guidance document, and Count II, which brought a sweeping programmatic
18 challenge to DHS's NEPA compliance for broad areas of immigration authority,
19 including: "1) employment based immigration; 2) family based immigration; 3)
20 long-term nonimmigrant visas; 4) parole; 5) Temporary Protected Status ("TPS");
21 6) refugees; 7) asylum; and 8) Deferred Action for Childhood Arrivals ("DACA")."
22 ECF No. 44, ¶ 1. The Court granted Defendants' motion, dismissing Count I
23 because it did not challenge a reviewable final agency action, and dismissing Court
24 II because it failed to identify discrete agency actions, and sought impermissible
25 programmatic review of the continuing and operations of DHS. ECF No. 55 at 8.

26 In the wake of the Court's Order, three claims challenging six separate
27 agency actions remain. Count III brings a facial challenge to the promulgation of a
28 NEPA Categorical Exclusion, CATEX A3. Count IV challenges the application of

1 CATEX A3 to four agency regulations, the DSO Rule, the STEM Rule, the
2 International Entrepreneur Rule, and the AC21 Rule. Count V challenges DHS’s
3 compliance with NEPA in issuing a programmatic EA for its 2014 Response to an
4 Influx of Unaccompanied Children and Families and a supplemental EA for
5 construction of temporary housing at Dilley, Texas.

6 Defendants lodged the administrative records for the six decisions, and the
7 matter is before the Court on the parties’ cross-motions for summary judgment.²

8 **B. The Challenged Decisions**

9 **1. Categorical Exclusion A3**

10 In 2004, DHS published proposed NEPA procedures in the Federal Register
11 for public comment. 69 Fed. Reg. 33,043 (June 14, 2004).³ The proposed
12 procedures included a Categorical Exclusion—CATEX A3—for “[p]romulgation
13 of rules [and] issuance of rulings or interpretations . . . of the following nature: (a)
14 Those of a strictly administrative or procedural nature;” and “(d) Those that
15 interpret or amend an existing regulation without changing its environmental
16 effect.” *Id.* at 33,056. The proposed NEPA procedures, including CATEX A3, were
17 approved by the CEQ in March 2006. *See* Letter from Connaughton to Chertoff
18 (March 23, 2006).⁴ DHS published its NEPA procedures in final form in April 2006.
19 71 Fed. Reg. 16,790 (Apr. 4, 2006).

20 In 2014, DHS published draft revised NEPA procedures for public comment.
21 DIR00001. The proposed revised procedures included both new Categorical

22 ² To facilitate review of the record, Defendants are filing herewith an Appendix
23 containing those record materials cited in this brief.

24 ³ The administrative record for DHS’s 2006 NEPA procedures is available on
25 DHS’s website. [https://www.dhs.gov/publication/national-environmental-policy-
26 act-nepa](https://www.dhs.gov/publication/national-environmental-policy-act-nepa) (last visited May 23, 2019). Cited excerpts are included in Defendants’
27 Appendix.

28 ⁴ [https://www.dhs.gov/sites/default/files/publications/Mgmt_NEPA_CEQConformit
yLetter_20060324_0.pdf](https://www.dhs.gov/sites/default/files/publications/Mgmt_NEPA_CEQConformityLetter_20060324_0.pdf) (last visited May 23, 2019).

1 Exclusions and Categorical Exclusions, including CATEX A3, which DHS
2 proposed to retain unchanged from the prior procedures. DIR00002. No member of
3 the public, including Plaintiffs, commented on CATEX A3. *See* DIR00270-288
4 (public comments); DIR00288-90 (addressing public comments).

5 As required by CEQ regulations, DHS consulted with CEQ. DIR00291-92.
6 After reviewing the procedures, CEQ concluded that they conform with NEPA and
7 the CEQ's regulations. *Id.* The NEPA procedures were published in final form in
8 November 2014. DIR00288.

9 **2. The Designated School Officials Rule**

10 DHS's Student and Exchange Visitor Program ("SEVP") manages the
11 process under which American educational institutions interact with foreign
12 students studying in the United States under F-1 and M-1 visas. DSO00009.
13 Students studying under F-1 and M-1 visas are visiting to attend school. They are
14 not immigrants to the United States.

15 In April 2015, after notice and comment rulemaking, DHS issued a rule
16 entitled Adjustments to Limitations on Designated School Official Assignment and
17 Study by F-2 and M-2 Nonimmigrants" (the "DSO" Rule). DSO00009. The rule
18 made two changes to improve administration of the SEVP. *Id.* First, the rule allows
19 school officials greater ability to increase the number of DSOs at each school.
20 DSO00010. DSOs are school employees who work as liaisons between the visiting
21 students, the schools, and the U.S. Government. *Id.* DHS found that having more
22 DSOs in particular schools could enhance the ability of DSOs to oversee the SEVP
23 and report necessary student information to the U.S. Government. *Id.* Second, the
24 rule allows spouses and children of visiting students to take classes, so long as they
25 are not taking a full course load. DSO00011. DHS concluded this change would
26 make studying in the United States. *Id.* With regard to NEPA, DHS concluded the
27 rule fell within CATEX A3 because it amended an existing rule "without changing
28

1 its environmental effect,” and there were no extraordinary circumstances creating
2 the potential for significant environmental effects. DSO00017.

3 **3. The STEM Rule**

4 On March 11, 2016, DHS issued a final rule entitled “Improving and
5 Expanding Training Opportunities for F-1 Nonimmigrant Students With STEM
6 Degrees and Cap-Gap Relief for All Eligible F-1 Students” (“STEM Rule”).
7 STEM000055. The STEM Rule modified the regulations applicable to
8 nonimmigrant students with degrees in STEM fields—science, technology,
9 engineering, or mathematics—from U.S. universities to allow such students to
10 participate in practical training opportunities for an additional 24 months.
11 STEM000056. The Rule also strengthened reporting requirements to help DHS
12 track students in the program. *Id.* With regard to NEPA, DHS concluded that the
13 Rule fell within CATEX A3 because it was a rule “of strictly administrative or
14 procedural nature,” amended an existing rule “without changing its environmental
15 effect,” and there were no extraordinary circumstances creating the potential for
16 significant environmental effects. STEM000132.

17 **4. International Entrepreneur Rule**

18 In January 2017, DHS issued a final rule establishing criteria for the use of
19 DHS’s discretionary authority to temporarily parole into the United States, on a
20 case-by-case basis, individual entrepreneurs of start-up entities with significant
21 potential for rapid growth and job creation. IER00041 (82 Fed. Reg. 5,238 (Jan.17,
22 2017)) (“International Entrepreneur Rule”). DHS found the Rule fell within
23 CATEX A3 and no extraordinary circumstances were present. IER00075,
24 IER00088. DHS also noted that the Rule would impact fewer than 3,000 individuals
25 per year, a number insignificant in the context of the overall U.S. population.
26 IER00088. On May 29, 2018, DHS proposed a rule ending the International
27 Entrepreneur parole program and removing the applicable regulations. *See* 83 Fed.
28

1 Reg. 24,415 (May 29, 2018).

2 **5. The AC21 Rule**

3 In November 2018, after public notice and comment, DHS issued a rule
4 entitled Retention of EB-1, EB-2, and EB-3 Immigrant Workers and Program
5 Improvements Affecting High-Skilled Nonimmigrant Workers (“AC21 Rule”).
6 AC00142. The AC21 Rule amended provisions of several existing employment-
7 based visa programs to better enable U.S. employers to employ highly skilled
8 workers with employment-based visas, and to increase the ability of visa-holding
9 workers to change positions or employers. *Id.* With regard to NEPA, DHS
10 determined that the Rule would primarily affect immigrant and nonimmigrant
11 workers who are already in the United State and have been present for a number of
12 years, and it that would not significantly impact the environment. AC000218-219.
13 The agency also found the Rule fell within the CATEX A3(d) because it only
14 “interpret[s] or amend[s] an existing regulation without changing its environmental
15 effect.” *Id.*

16 **6. Programmatic EA for Response to Influx of** 17 **Unaccompanied Children and Families and Supplemental** 18 **EA for Housing at Dilley, Texas**

19 In 2014, DHS prepared a programmatic EA and issued a FONSI assessing
20 the impacts of accelerating expansion of its infrastructure—temporary detention
21 space, transportation and medical care—to address an influx of children and
22 families crossing the southwestern border. UAC00534-58, UAC00568-71. The
23 programmatic EA defined the parameters for when more detailed NEPA analysis
24 of site-specific proposals would be required. UAC00550-58. In August 2014, DHS
25 prepared a supplemental EA to consider the environmental impacts of the
26 construction of a facility near Dilley, Texas, which would house up to 2,400 women
27 and children pending the disposition of their immigration proceedings. UAC00775-
28 948. DHS concluded the facility would not have significant environmental impacts,

1 and issued a FONSI. UAC00948.

2 STANDARD OF REVIEW

3 Agency decisions are reviewed under the judicial review provisions of the
4 Administrative Procedure Act (“APA”), 5 U.S.C. §§ 701-06. *Lands Council v.*
5 *McNair*, 537 F.3d 981, 987 (9th Cir. 2008). Under the APA, agency decisions may
6 be set aside if they are “arbitrary, capricious, an abuse of discretion, or otherwise
7 not in accordance with law.” 5 U.S.C. § 706(2)(A). In accordance with that
8 standard, an agency’s decision will be overturned

9 [O]nly if the agency relied on factors which Congress has not intended it to
10 consider, entirely failed to consider an important aspect of the problem, or
11 offered an explanation for its decision that runs counter to the evidence before
12 the agency or is so implausible that it could not be ascribed to a difference in
view or the product of agency expertise.

13 *McFarland v. Kempthorne*, 545 F.3d 1106, 1110 (9th Cir. 2008) (citations and
14 quotation marks omitted).⁵ The arbitrary and capricious standard requires affirming
15 the agency action if a reasonable basis exists for its decision. *Indep. Acceptance Co.*
16 *v. California*, 204 F.3d 1247, 1251 (9th Cir. 2000).

17 ARGUMENT

18 I. Plaintiffs Lack Standing

19 To establish Article III standing, Plaintiffs must demonstrate an injury that is
20 (1) “concrete, particularized, and actual or imminent,” (2) “fairly traceable to the
21 challenged action,” and (3) “redressable by a favorable ruling.” *Clapper v. Amnesty,*
22 *Int’l*, 568 U.S. 398, 409 (2013) (citing *Monsanto Co. v. Geertson Seed Farms*, 561
23 U.S. 139 (2010)).

24 The party seeking jurisdiction bears the burden of establishing standing, and
25 “must ‘set forth’ by affidavit or other evidence ‘specific facts’” establishing their

26
27 ⁵ The Ninth Circuit has endorsed the use of Rule 56 motions for summary
28 judgment in reviews of agency administrative decisions, under the APA. *Nw.*
Motorcycle Ass’n v. U.S. Dep’t of Agric., 18 F.3d 1468, 1471-72 (9th Cir. 1994).

1 standing. *Clapper*, 568 U.S. at 409 (quoting *Lujan v. Defs. of Wildlife*, 504 U.S.
2 555, 561 (1992)). Because federal courts are courts of limited jurisdiction, the
3 presumption is that they lack jurisdiction unless the party asserting jurisdiction
4 establishes it. *Kokkonen v. Guardian Life Ins. Co. of Am.*, 511 U.S. 375, 377 (1994).
5 The task of establishing standing is ““substantially more difficult”” in cases such as
6 this one, where Plaintiffs are not themselves the “object[s] of the government action
7 or inaction [they] challenge.” *Summers v. Earth Island Inst.*, 555 U.S. 488 (2009)
8 (quoting *Lujan*, 504 U.S. at 562).

9 Plaintiffs—who proffer no argument in their summary judgment brief in
10 support of standing—fall well short of demonstrating that they have standing. With
11 their amended complaint Plaintiffs submitted numerous affidavits alleging two
12 classes of injury: (1) broad environmental and quality of life harms allegedly
13 attributable to immigration induced population growth,⁶ and (2) injuries allegedly
14 caused by individuals illegally crossing the southwestern border.⁷ But Plaintiffs

15
16 ⁶ See Aff. of Richard D. Lamm, ECF No. 44-9, ¶ 8 (alleging harms to the quality
17 of life in Colorado caused by “mass foreign immigration”); Aff. of Don
18 Rosenberg, ECF No. 44-10, ¶ 9 (alleging population growth in California in the
19 past 30 years has harmed the environment and quality of life); Aff. of Claude
20 Wiley, ECF No. 44-11 (asserting quality of life is decreased by population
21 growth); Aff. of Ric Oberlink, ECF No. 44-12 (alleging harms from traffic and
22 crowding in California caused by population growth); Aff. of Richard Schneider,
23 ECF No. 44-13 (asserting injuries from increased development and traffic caused
24 by population growth in California); Aff. of Stuart Hurlbert, ECF No. 44-14
25 (alleging environmental and aesthetic harms in California from population
26 growth); Aff. of Glen Colton, ECF No. 44-15 (alleging harms in Colorado from
27 population growth since 1975); Aff. of John Oliver, ECF No. 44-18 (alleging
28 broad harms in Florida from population growth since 1970).

⁷ See Aff. of Fred Davis, ECF No.44-7(alleging environmental, property, and
health impacts caused by illegal border crossers); Aff. of Peggy Davis, ECF 44-8
(alleging environmental, property, and health impacts caused by illegal border
crossers); Aff. of Caren Cowan, ECF No. 44-16 (alleging fear and property
destruction near the border caused by illegal border crossing); Aff. of John Ladd,

1 make no attempt to demonstrate that these injuries are “fairly traceable” to the six
2 decisions before the Court. Plaintiffs instead rely on a broad policy-level argument,
3 reasoning that: (1) DHS is charged with “enforcing and administering our
4 immigration laws,” (2) immigration “drives population growth,” and (3) population
5 growth has negative environmental impacts. *See* Pl. Br. at 1. While this broad policy
6 concern may be appropriate “in the offices of the Department or the halls of
7 Congress,” *Lujan v. National Wildlife Federation*, 497 U.S. 871 (1990), it does not
8 suffice to carry Plaintiffs’ burden of demonstrating a “concrete and particularized”
9 injury that is “fairly traceable” to the decisions under review by the Court. *Clapper*,
10 568 U.S. at 409.

11 First, Plaintiffs fail to even allege, much less demonstrate, that any of the
12 challenged actions have a direct impact on population growth or border crossings
13 and thus could cause the harms they allege. And indeed, there is no such direct
14 causal link. The DSO and STEM rules pertain only to students temporarily studying
15 in the United States, not immigrants adding to the permanent population and not
16 individuals illegally crossing the southwestern border. The AC21 Rule primarily
17 addresses a population of immigrant and nonimmigrant visa holders who are
18 already in the United States, not new immigrants or illegal border crossers.
19 AC00218. The International Entrepreneur Rule is expected to impact an
20 insignificant number of immigrants per year, and it has no relation to individuals
21 illegally crossing the border. IER00088. And, DHS’s 2014 decision to construct
22 temporary housing near Dilley, Texas, does not increase immigration; it is a
23 *response* to people entering the country illegally. It does not influence whether the
24 individuals housed in the facility will ultimately be allowed to immigrate.

25
26 _____
27 ECF No. 44-17 (alleging environmental, property and emotional injury caused by
28 illegal border crossing); and Aff. of Ralph D. Pope, ECF No. 44-19, (alleging
harm from “ecosystem degradation” caused by illegal border crossers).

1 Instead of attempting to provide argument or facts supporting a claim that the
2 actions they challenge directly increase population, Plaintiffs rely on an
3 unsupported assumption that the actions they challenge will induce permanent
4 immigration and induce an increase in border crossings. *See, e.g.*, Pl. Br. at 2.
5 Plaintiffs ask the Court to assume, for example, that the changes in the DSO Rule
6 or the STEM Rule will make it more likely that visiting students will remain in the
7 country permanently, either by illegally remaining and successfully evading
8 removal, or by seeking and being granted more permanent long-term status.
9 Similarly, Plaintiffs ask the Court to assume that the challenged decisions will
10 induce more individuals to attempt to illegally cross the southwestern border and
11 will increase the number of individuals who are permitted to stay in the country or
12 who succeed in staying the county illegally.

13 But standing cannot rest on speculation about the actions of independent third
14 parties—the Court should not have to guess the motivations of individuals seeking
15 to immigrate legally or illegally or to divine the future conclusions of officials
16 deciding questions related to immigration benefits or enforcement. *See Lujan*, 504
17 U.S. at 555 (An injury “has to be fairly traceable to the challenged action of the
18 defendant, and not . . . th[e] result [of] the independent action of some third party
19 not before the Court.”). Where a plaintiff alleges that government action “caused
20 injury by influencing the conduct of third parties . . . more particular facts are needed
21 to show standing.” *Mendia v. Garcia*, 768 F.3d 1009 (9th Cir. 2014) (citation
22 omitted). Specifically, without relying on “speculation” or “guesswork” about the
23 third parties’ motivations, a plaintiff must offer facts showing that the government’s
24 unlawful conduct “is at least a substantial factor motivating the third parties’
25 actions.” *Id.*

26 Rather than meeting their heightened burden of showing “more particular
27 facts” demonstrating the influence of the challenged decisions on the actions of
28

1 independent third parties, Plaintiffs present no facts at all showing that the six
2 decisions it issue—rather than broader economic and geopolitical forces—are the
3 cause of their injuries. Plaintiffs’ declarants instead attribute their injuries to
4 generalized harms occurring over decades or trace their injuries to specific DHS
5 actions not before the Court, including the DACA policy, TPS decisions, and
6 “amnesty programs.” *See, e.g.*, Aff. of Glen Colton, ECF No. 44-15 (alleging harms
7 from population growth since 1975); Aff. of Don Rosenberg, ECF No. 44-10, ¶ 9
8 (alleging harms from population growth over past 30 years); Aff. of Fred Davis,
9 ECF No.44-7(tracing injury to “lax interior enforcement policies,” “amnesty
10 programs,” and DACA); Aff. of Don Rosenberg , ECF No. 44-10, ¶ 10 (tracing
11 death of his son to individual who entered the United States illegally in 1999 and
12 was granted TPS); Ladd Aff., ECF No. 44-17, ¶ 12 (tracing injury to “catch and
13 release policies,” “Morton Memos in 2011,” DACA, and “decisions to cut back on
14 worksite enforcement in 2009”). This Court has already rejected Plaintiffs’ attempt
15 to challenge these broad programs, and Plaintiffs cannot now base their standing to
16 challenge the six discrete decisions before the Court on injuries allegedly traceable
17 to broad claims no longer before the Court. *See* ECF No. 55 at 7 (dismissing
18 Plaintiffs’ challenges to “long term nonimmigrant visas, parole, Temporary
19 Protected Status, refugees, and asylum, and DACA”); *see also Musacchio v. United*
20 *States*, 136 S. Ct. 709, 716 (2016) (“The law-of-the-case doctrine generally
21 provides that when a court decides upon a rule of law, that decision should continue
22 to govern the same issues in subsequent stages in the same case.” (quotation
23 omitted)).

24 Finally, even had Plaintiffs demonstrated that population growth was fairly
25 traceable to the challenged decisions, they still fall short of demonstrating the links
26 of causation between that population growth and their alleged injuries. Plaintiffs
27 allege population-based harms—increased traffic, increasing crowding in particular
28

1 parks—in specific areas of California, Colorado and Florida. *See, e.g.*, Willey Aff.,
2 ECF No. 44-10 (alleging harms in Los Angeles area); Ric Oberlink, ECF No. 44-
3 12 (alleging injuries to use of Redwood Regional Park, Yosemite, and Mt.
4 Whitney). But Plaintiffs adduce no evidence that, assuming the challenged
5 decisions induce population growth, that growth will occur in these areas or will
6 occur in manner causing Plaintiffs harm; i.e. that individuals will locate in areas
7 used by Plaintiffs, drive on the highways used by Plaintiffs, or use the parks and
8 other resources used by Plaintiffs. Plaintiffs appear to ask the Court to simply
9 assume that any population growth anywhere in the country will necessarily harm
10 their interests. But the Supreme Court has squarely rejected reliance on this sort of
11 probabilistic link to injury. *Summers*, 555 U.S. at 498 (basing standing on the
12 “statistical probability that some of [plaintiffs’] members are threatened with
13 concrete injury . . . would make a mockery of our prior cases”).

14 In sum, Plaintiffs proffer a collection of alleged injuries that they tie only in
15 conclusory fashion to immigration policies *writ large*, or to specific DHS programs
16 not before the Court. These broad and untethered allegations fall short of the
17 requirement that an injury be “fairly traceable” to the government action
18 challenged, and Plaintiffs’ complaint should be dismissed for want of standing.

19 **II. Plaintiffs Have Waived Any Challenge to Two of the Actions Before the** 20 **Court**

21 Even if Plaintiffs have standing, their challenge to two of the agency
22 decisions—CATEX A3 and the DSO Rule—are precluded by Plaintiffs’ failure to
23 raise their concerns in the public comment process for the decisions.

24 A party seeking to challenge an agency’s compliance with NEPA must
25 structure its participation in the administrative process to alert the agency to the
26 party’s contentions so that the agency may give the concerns meaningful
27 consideration. *Dep’t of Transp. v. Pub. Citizen*, 541 U.S. 752, 764 (2004). Failure
28 to adequately identify and discuss a particular issue during the public comment

1 period constitutes waiver of the right to pursue that issue in court. *Id.*; *see also*
2 *Oregon Nat. Desert Ass'n v. Jewell*, 840 F.3d 562 (9th Cir. 2016) (holding plaintiffs
3 barred from litigating issue not clearly presented in public comments).

4 In this case Plaintiffs failed to comment on the DHS's promulgation of NEPA
5 Procedures (including CATEX A3) in either 2006 or 2014, and also failed to
6 comment on the DSO Rule *See* DIR00270-287 (public comments on draft NEPA
7 procedures); DSO00271-329 (public comments on DSO Rule). Because Plaintiffs
8 failed to present their claims that these decisions might have significant effects on
9 U.S. population growth during the public comment process, they have waived their
10 right to challenge the decisions on that basis in this Court.

11 **III. Plaintiffs' Facial Challenge to CATEX A3 Fails**

12 Plaintiffs bring a facial challenge to DHS's CATEX A3, asserting that (1) the
13 category is overly broad; (2) DHS failed to engage in "scoping" procedures when
14 promulgating the Categorical Exclusion, and that the promulgation of the
15 Categorical Exclusion violates DHS's own NEPA procedures. These claims fail,
16 first because the Plaintiffs' challenge to CATEX A3 is barred by the statute of
17 limitations, and second, because the DHS fully complied with NEPA when it
18 promulgated the category.

19 **A. Plaintiffs' Facial Challenge is Untimely**

20 Because neither NEPA nor the APA contains a statute of limitation, the
21 general six-year statute of limitations in 28 U.S.C. § 2401(a) applies. *Sierra Club v.*
22 *Penfold*, 857 F.2d 1307 (9th Cir. 1988). Facial challenges to a regulation accrue on
23 the date that the challenged regulation was promulgated. *P & V Enterprises v. U.S.*
24 *Army Corps of Eng'rs*, 516 F.3d 1021 (D.C. Cir. 2008). CATEX A3 was
25 promulgated in 2006. 71 Fed. Reg. 16790 (Apr. 4, 2006). The statute of limitations
26 for a facial challenge to CATEX A3 thus ran in 2012, four years before Plaintiffs
27 filed suit. *See Bicycle Trails Council of Marin v. Babbitt*, 82 F.3d 1445, 1456 n.5
28

1 (9th Cir. 1996) (holding challenge to categorical exclusion barred by statute of
2 limitations).

3 **B. CATEX A3 is Not Arbitrary or Capricious**

4 Should the Court conclude that Plaintiffs' facial challenge to CATEX 3 is
5 justiciable, the record demonstrates the category was properly developed consistent
6 with the applicable law and following CEQ and DHS procedures.

7 In order to establish a Categorical Exclusion, the CEQ requires that an
8 agency: (1) publish the proposed category in the Federal Register, (2) provide an
9 opportunity for public comment on the proposal, and (3) submit the proposed CE
10 to CEQ for review and approval. 40 C.F.R. § 1507.3(a). Here DHS properly
11 followed the CEQ regulations when it established CATEX A3.

12 The proposed Categorical Exclusion was published in the Federal Register
13 for public comment in 2004. 69 Fed. Reg. 33,043. The category was approved by
14 the CEQ in March 2006. *See* Letter from Connaughton to Chertoff (March 23,
15 2006). DHS published its NEPA regulations in final form in April 2006. 71 Fed.
16 Reg. 16790 (Apr. 4, 2006). In 2014 DHS published draft revised NEPA regulations,
17 which retained CATEX A3, for public comment. *See* DIR00001. These regulations
18 were approved by CEQ, DIR00291, and published in final form in November 2014.
19 DIR00288.

20 As demonstrated below, Plaintiffs' critiques of CATEX A3—that it is
21 improperly broad, didn't comply with NEPA scoping requirements, and violates
22 DHS's own NEPA procedures—are all unavailing.

23 **1. CATEX A3 is Properly Defined**

24 Plaintiffs first contend that CATEX A3 is contrary to CEQ regulations
25 requiring that Categorical Exclusions include “[s]pecific criteria for and
26 identification of those typical classes of action” which normally do not require
27 preparation of an EIS or an EA. Pl. Br. at 9; *see also* 40 C.F.R. § 1507.3(b)(2)(iii).
28

1 CATEX A3, however, properly identifies a class of actions—rules, interpretations,
2 policies, orders, directives, notices, procedures, manual, advisory circulars, and
3 other guidance documents—and then identifies specific criteria for identifying
4 typical examples within that class; for example, those “of a strictly administrative
5 or procedural nature,” or those that “interpret or amend an existing regulation
6 without changing its environmental effect.” DIR00355 (A3(a), (d)).

7 While Plaintiffs deem CATEX A3 contrary to the dictionary definition of
8 “specific,” *see* Pl. Br. at 9, the category plainly comports with the CEQ regulations.
9 Indeed, the CEQ has explicitly discouraged the use of “detailed lists of specific
10 activities” and encouraged agencies to instead identify “broadly defined criteria
11 which characterize types of actions that, based on the agency’s experience,”
12 normally do not have “significant environmental effects.” 48 Fed. Reg. 34,263,
13 34,265 (July 28, 1983). Compellingly, CEQ itself reviewed DHS’s NEPA
14 procedures, including CATEX A3, and determined that they conform to NEPA and
15 the CEQ’s own regulations. *See* Letter from Connaughton to Chertoff (March 23,
16 2006); DIR00291. The CEQ’s interpretation of its own regulations is entitled to
17 “great deference” from the Court. *Sierra Club v. Bosworth*, 510 F.3d 1016 (9th Cir.
18 2007) (quoting *Heartwood, Inc. v. U.S. Forest Service*, 230 F.3d 947 (7th Cir.
19 2000)).

20 Plaintiffs’ related suggestion that the Category A3 is arbitrary and capricious
21 because it could theoretically include actions with significant cumulative effects,
22 *see, e.g.*, Pl. Br. at 10, is not persuasive. First, as a legal matter, the fact that it is
23 *possible* to speculate circumstances in which a regulation could be applied
24 improperly does not constitute grounds for finding the regulation facially invalid.
25 *See, e.g., Babbitt v. Sweet Home*, 515 U.S. 687, 709 (1995) (O’Connor, J.,
26 concurring) (noting that “there is no need to strike a regulation on a facial challenge
27 out of concern that it is susceptible of erroneous application”); *Anderson v.*
28

1 *Edwards*, 514 U.S. 143, 156 n.6 (1995) (noting plaintiffs “could not sustain their
2 burden [of showing regulation facially invalid] even if they showed that a possible
3 application of the rule . . . violated federal law”).

4 Second, Plaintiffs ignore that CATEX A3 must be used in conjunction with
5 the “extraordinary circumstances” inquiry, which provides a “safety-valve” that
6 prevents proposals with significant effects from being issued under the category.
7 *See, e.g., Utah Env'tl. Cong. v. Bosworth*, 443 F.3d 732 (10th Cir. 2006). As required
8 by CEQ regulations, the DHS NEPA procedures contain a list of “extraordinary
9 circumstances” that identify conditions where a proposal may have significant
10 impacts and use of a categorical exclusion would be improper. DIR00330-32.
11 Directly responsive to Plaintiffs’ concern, one of the listed extraordinary
12 circumstances is “whether the action is related to other actions with individually
13 insignificant but cumulatively significant impacts.” DIR00332.

14 **2. DHS Did Not Violate the NEPA Scoping Requirements**

15 Plaintiffs contend, based on the Ninth Circuit’s decision in *Sierra Club v.*
16 *Bosworth*, that DHS erred in not conducting a “scoping” process prior to the
17 establishment of CATEX A3. Pl. Br. at 11. This claim fails. The DHS was not
18 required to conduct scoping for CATEX A3 and the agency properly documented
19 its determination that the category would not have significant effects.

20 “Scoping” is a NEPA process designed to gather input as to the “scope of the
21 issues to be addressed and for identifying the significant issues related to a proposed
22 action.” 40 C.F.R. § 1501.7. Under the CEQ regulations, scoping is required only
23 for actions requiring preparation of an EIS. *Id.* (scoping applies “[a]s soon as
24 practicable after [the agency’s] decision to prepare an environmental impact
25 statement”).⁸ The CEQ regulations do not extend the scoping obligation to the
26

27 ⁸ *See also* CEQ Guidance Regarding NEPA Regulations, 48 Fed. Reg. 34,265
28 (1983) (“The purpose of this [scoping] process is to determine the scope of the EIS

1 creation of categorical exclusions. 40 C.F.R. § 1507.3(a).

2 In *Bosworth*, the court did, as Plaintiffs note, fault the Forest Service for
3 failing to conduct scoping during the creation of a categorical exclusion. 510 F.3d
4 1016, 1026 (9th Cir. 2007). That holding, however, is not generalizable to other
5 agencies because it rests on the court’s belief that the Forest Service’s NEPA
6 procedures had extended the scoping requirements beyond EISs to “all proposed
7 actions.” In applying the scoping requirement the *Bosworth* court relied the Forest
8 Service’s Handbook (“FSH”) and on *Alaska Center for Environment v. United*
9 *States Forest Service*, which found that the FSH requires the agency to “conduct
10 scoping for ‘all proposed actions, including those that would appear to be
11 categorically excluded.’” 189 F.3d 851, 858 (9th Cir. 1999) (emphasis added).

12 In contrast to the Forest Service-specific procedures at issue in *Bosworth*,
13 DHS’s NEPA procedures explicitly require scoping only for EISs. DIR00195. For
14 creation of Categorical Exclusions, DHS NEPA procedures require only “CEQ
15 review and public comment.” DIR00199 (Paragraph 3(a)(iii)). This Court should
16 decline Plaintiffs’ invitation to engraft onto DHS’s NEPA procedures an obligation
17 not required by the statute. *See Vermont Yankee Nuclear Power Corp. v. Nat.*
18 *Resources Def. Council*, 435 U.S. 519, 525 (1978) (holding courts should not
19 impose their “own notions of proper procedures upon agencies entrusted with
20 substantive functions by Congress”).

21 To the extent that Plaintiffs intend their “scoping” claim to be a challenge to
22 the administrative record underlying CATEX A3, that challenge also fails. Plaintiffs
23 contend that CATEX A3 is intended to include “the entire scope of [DHS’s] myriad
24 actions governing the administration of the U.S. immigration laws,” and that the
25 administrative record does not demonstrate that “all of DHS’[s] immigration related
26 actions[] have no potential to individually or cumulatively impact the ‘human
27 _____
28 so that preparation of the documents can be effectively managed.’”).

1 environment.” Pl. Br. at 11. This argument is a strawman. CATEX A3 establishes
2 a general category for types of rules and interpretations that do not have significant
3 environmental effects. The category itself is not related to immigration, and it can
4 be used by any DHS component for any qualifying rule. *See* DIR00309 (noting
5 procedures apply to all components of DHS). Nowhere does DHS assert that the
6 category is intended to encompass all immigration related activities; DHS will
7 determine and conduct the appropriate level of NEPA analysis for its actions at the
8 time they are proposed.⁹ *See* DIR00293 (noting NEPA procedures apply to DHS
9 “programs, projects, and other activities”). Because CATEX A3 does not purport
10 to cover “all of DHS’[s] immigration-related actions,” Pl. Br. at 11, there was no
11 need for DHS to establish a record that any and all immigration-related actions have
12 no potential to impact the environment.

13 Contrary to Plaintiffs’ assertions, CATEX A3 is well-supported by the
14 record. DHS’s 2006 NEPA procedures, including CATEX A3, were developed
15 over a year-long process by a panel of experts. *See* 69 Fed. Reg. 33,043. In
16 particular, the panel developed CATEX A3 through comparison to long-standing
17 categories used by multiple other agencies, a process explicitly recommended by
18 the CEQ. *See* Admin. R. for Categorical Exclusions;¹⁰ 71 Fed. Reg. 16,790, 16791
19 (Apr. 4, 2006) (“The CATEXs were developed on the basis of an administrative
20 record from the components that comprise the Department and the expertise of the
21 Panel members); 75 Fed. Reg. 75,628, 75,629 (Dec. 6, 2010) (CEQ guidance
22 encouraging agencies “to consider information and records from other private and
23 public entities, including other Federal agencies”). CEQ reviewed and approved the

24 _____
25 ⁹ For example, in this case, DHS prepared a programmatic EA and Supplemental
26 EA to analyze the environmental effects of adding infrastructure to address the
influx of children and families along the southwestern border.

27 ¹⁰

28 https://www.dhs.gov/sites/default/files/publications/Mgmt_NEPA_AdminRecdetailedCATEXsupport_0.pdf

1 DHS’s 2006 NEPA procedures, including CATEX A3. *See* Letter from
2 Connaughton to Chertoff (March 23, 2006).

3 In sum, when it established CATEX A3, DHS was not required to conduct
4 scoping, nor was it required to demonstrate that all of the Departments’
5 immigration-related actions have no potential to impact the human environment.
6 The category was developed and supported by a process approved by the CEQ.

7 **3. Category A3(d) Complies with DHS’s NEPA Requirements**

8 Finally Plaintiffs assert that CATEX A3(d) is facially inconsistent with
9 DHS’s NEPA procedures because it allows categorical exclusion of rules that
10 “interpret or amend an existing regulation without changing its environmental
11 effect” while the DHS’s NEPA procedures prohibit the agency from using a
12 categorical exclusion on a proposed action that is “a piece of a larger action.” Pl.
13 Br. at 12-13. Plaintiffs submit that any amendment or interpretation is necessarily
14 “a piece of the larger action”—the existing rule and the “larger regulatory
15 framework.” *Id.* This reading misconstrues DHS’s NEPA procedures.

16 In requiring that a Categorical Exclusion not be applied to “a piece of a larger
17 action” DHS did not intend to preclude use of a Categorical Exclusion in any
18 instance where the proposed action is, in any manner, “connected to” the “larger
19 regulatory framework.” Pl. Br. at 13. Were that the case, the exception would
20 quickly swallow the rule, as all DHS actions are arguably connected to the
21 Department’s larger regulatory framework. Instead, as the DHS policy itself makes
22 clear, the “not a piece of a larger action” requirement precludes “segmentation”—
23 the artificial division of a single proposed action into smaller components to escape
24 the application of NEPA to some of the segments or to reduce the perceived impacts
25 of the whole action. *See* DIR00331 (“It is not appropriate to segment a proposed
26 action or connected actions by division into smaller parts in order to avoid a more
27 extensive evaluation of the potential for environmental impacts under NEPA”); *see*
28

1 *also Sensible Traffic Alternatives v. Fed. Transit Admin.*, 307 F. Supp. 2d 1149 (D.
2 Haw. 2004) (defining segmentation).

3 To engage in impermissible segmentation, an agency must be aware of the
4 scope of the entire action at the time it is proposed. *See, e.g., O'Reilly v. U.S. Army*
5 *Corps of Eng'rs*, 477 F.3d 225, 237 (5th Cir. 2007) (“improper segmentation is
6 usually concerned with projects that have reached the proposal stage.”); *Env'tl Def.*
7 *Fund v. Marsh*, 651 F.2d 983 (5th Cir 1981) (finding no impermissible
8 segmentation where one project is proposed and the other is still being studied). The
9 later discovery of a need to amend an existing regulation is not segmentation of a
10 single proposed action, it is a simply a separate later decision. Tellingly, Plaintiffs
11 cite to no caselaw for their untenable theory that a later amendment to a regulation
12 should be considered part of the initial regulation for NEPA purposes.

13 Moreover, even if a later amendment could be deemed connected to the initial
14 rule for purposes of a segmentation analysis, that would not provide a basis for the
15 facial invalidation of CATEX A3(d) because its use is still explicitly limited to
16 circumstances where the amendment or interpretation does not alter the
17 environmental impact of the original rule. So, by its own terms, CATEX A3(d) still
18 cannot be used for actions with significant environmental effects.

19 In sum, Plaintiffs' facial challenge to the validity of CATEX A3 fails. The
20 category is properly defined, was created under a process approved by the CEQ,
21 and is not in conflict with DHS's NEPA procedures. Federal Defendants are
22 entitled to summary judgment on Count III.

23 **IV. DHS Properly Applied CATEX A3 to the Four Rules Challenged by** 24 **Plaintiffs**

25 Drawing from disparate and inapplicable provisions of NEPA and inapposite
26 caselaw, Plaintiffs contend that DHS erred in concluding that the promulgation of
27 four regulations—the DSO Rule, the STEM Rule, the AC21 Rule, and the
28 International Entrepreneur Rule—fell within CATEX A3. Considered under the

1 appropriate standards, however, the record makes clear that the DHS properly
2 applied CATEX A3 to all four rules.

3 **A. Plaintiffs Misconstrue the Applicable Standards**

4 When applying a categorical exclusion to a proposed action an agency must
5 show: (1) that the proposed action fits within the established category; and (2) that
6 there are no extraordinary circumstances requiring preparation of an EA or EIS.
7 *Alaska Ctr.*, 189 F.3d at 858. DHS's NEPA procedures add a third determination,
8 that the action not be segmented from "a larger action." DIR00331.

9 The purpose of the categorical exclusion process is to save agency resources
10 for actions with significant impacts, and thus the requirements for documenting the
11 application of a CATEX are minimal; the agency need only "adequately explain its
12 decision." *Alaska Ctr.*, 189 F.3d at 859. So long as there is "a rational connection
13 between the facts and the conclusion made, the [agency] has not acted arbitrarily."
14 *Id.* The agency's application of a categorical exclusion need not follow any specific
15 form. *See, e.g., California v. Norton*, 311 F.3d 1162, 1176 (9th Cir. 2002) ("In many
16 instances, a brief statement that a categorical exclusion is being invoked will
17 suffice."); *Ctr. for Food Safety v. Johanns*, 451 F. Supp. 2d 1165, 1174 (D. Haw.
18 2006) (when applying a categorical exclusion, "the agency must simply explain its
19 decision in a reasoned manner"); *Back Country Horsemen of Am. v. Johanns*, 424
20 F. Supp. 2d 89, 99 (D.D.C. 2006) (upholding use of a categorical exclusion where
21 the agency did not document the decision). "Once the agency considers the proper
22 factors and makes a factual determination on whether the impacts are significant or
23 not, that decision implicates substantial agency expertise and is entitled to
24 deference." *Alaska Ctr.*, 189 F.3d at 859.

25 Ignoring that the function of categorical exclusions is to reduce paperwork
26 and delay, 40 C.F.R. §§ 1500.4(p), 1500.5(k), Plaintiffs seek to impose additional
27 procedural obligations, asserting that DHS must conduct "scoping" and a
28

1 cumulative effects analysis when applying a categorical exclusion to a proposed
2 action. Pl. Br. at 17-18. Neither process is applicable here. First, with regard to
3 scoping, Plaintiffs mistakenly rely on a line of cases that rest on Forest Service-
4 specific NEPA regulations, which extend scoping obligations to “all proposed
5 actions.” See Pl. Br. at 18 (citing *Citizens for Better Forestry v. USDA*, 481 F. Supp.
6 2d 1059, 1082 (N.D. Cal. 2007) (“the Forest Service is required to conduct scoping
7 of ‘all proposed actions, including those that would appear to be “categorically
8 excluded”” citing *Alaska Ctr.*, 189 F.3d at 859)). These cases are inapplicable here,
9 because neither NEPA itself, nor CEQ regulations, nor DHS procedures, extend the
10 scoping process to the use of categorical exclusions.

11 Plaintiffs’ contention that DHS is required to conduct a cumulative effects
12 analysis when applying a categorical exclusion is also misplaced. By definition
13 categorical exclusions are categories of actions which the agency has already
14 determined “do not individually or cumulatively have a significant effect on the
15 human environment.” 40 C.F.R. § 1508.4. Obligating agencies to conduct a
16 cumulative effects analysis when using the category would thus “effectively render
17 useless the purpose of categorical exclusions,” *Utah Env’tl. Cong. v. Bosworth*, 443
18 F.3d at 740, and the Ninth Circuit has squarely rejected any such obligation. See
19 *Ctr. for Biological Diversity v. Salazar*, 706 F.3d 1085 (9th Cir. 2013) (holding
20 application of 40 C.F.R § 1508.25 –which requires consideration of connected,
21 cumulative and similar actions—“is inconsistent with the efficiencies that the
22 abbreviated categorical exclusion process provides”); *Sequoia Forestkeeper v. U.S.*
23 *Forest Service*, 2010 WL 5059621 (holding cumulative effects analysis not required
24 when applying categorical exclusions).¹¹

25
26 ¹¹ Plaintiffs deride the fact that agencies are not required to conduct a cumulative
27 effects analysis when applying a categorical exclusion as a “cynical tautology.” Pl.
28 Br. at 19. But CEQ created categorical exclusions to “reduce paperwork and delay,
so that EAs or EISs are targeted toward proposed actions that truly have the

1 In short, to properly apply CATEX A3, DHS was required only to determine
2 that the proposed rules fell within the category, there were no extraordinary
3 circumstances, and the rules were not “a piece of a larger action.” This Court should
4 decline to impose on the agency additional procedures not required by statute or
5 regulations. *Vermont Yankee*, 435 U.S. at 525.

6 **B. DHS Reasonably Applied CATEX A3(d) to All Four Rules**

7 Plaintiffs assert that the DHS improperly determined that the rules at issue
8 fall within CATEX A3(d), which covers rules that “amend an existing regulation
9 without changing its environmental effect.” Pl. Br. at 20. Plaintiffs contend DHS’s
10 use of CATEX A3(d) was improper because they believe: (1) the category cannot
11 be used unless the rule being amended has itself undergone NEPA analysis; (2) the
12 rules are parts of a larger action; and (3) the rules may have significant impacts on
13 the population of the United States. None of these arguments are persuasive.

14 **1. CATEX A3(d) Does Not Require NEPA Review of the**
15 **Underlying Rule**

16 Plaintiffs first argue that DHS cannot use CATEX A3(d) to amend existing
17 regulations if the underlying regulations never received NEPA review. Pl. Br. at 20-
18 21. Nothing in CATEX A3(d) itself or elsewhere in the DHS’s NEPA procedures,
19 however, imposes any such restriction. By its terms, CATEX A3(d) only requires
20 that the proposed amendment not change the environmental effect of the existing
21 rule. The Court should not add procedural requirements not found in the text of the
22 category itself. *Vermont Yankee*, 435 U.S. at 525.

23 Plaintiffs suggest that in the absence of a NEPA analysis of the underlying
24 rule, DHS cannot understand the “original impact of the regulation.” Pl. Br. at 21.

25
26 potential to cause significant environmental effects.” 75 Fed. Reg. 75,628, 75,631
27 (Dec. 6, 2010). Requiring the agencies to conduct a cumulative effects analysis for
28 each project before applying a categorical exclusion would subvert the very intent
of the exception process. *Utah Envtl. Cong. v. Bosworth*, 443 F.3d at 740.

1 This argument misapprehends the categorical exclusion. CATEX 3A(d) does not
2 require DHS to show that prior rule *including* the proposed amendment lacks
3 significant environmental effects, only that the incremental change to the rule being
4 proposed will not *change* the effects of the underlying rule. That conclusion does
5 not require a NEPA analysis of the underlying rule, it only requires that the change
6 itself be of nominal impact.¹² Here, as set forth below, the DHS provided an
7 adequate explanation of its conclusion that the four rules will not significantly
8 change the effects of the underlying rules on population growth (the only
9 environmental effect alleged by Plaintiffs).

10 **2. The Four Rules are Not Pieces of a Larger Action**

11 Plaintiffs' second claim is that DHS's conclusion that the four rules are
12 covered by CATEX A3(d) is arbitrary or capricious because DHS's NEPA
13 procedures preclude the use of categorical exclusions when the proposed action is
14 a "piece of a larger action." DIR00331. In a reprise of their facial challenge to
15 CATEX A3(d), Plaintiffs claim that each the four rules are by definition a "piece of
16 a larger action"—the rule or policy they amend—and thus cannot be categorically
17 excluded. As explained above, this argument misconstrues the "no piece of a larger
18 action" provision of DHS's NEPA regulations. *See supra* at 21.

19 DHS's prohibition on using a categorical exclusion on an action that is "a
20 piece of a larger action" is designed to avoid segmentation—dividing a single
21 proposed action into smaller parts to reduce the perceived impact of the action and
22 avoid more detailed NEPA analysis. Issuance of a new rule amending a rule or a
23

24 ¹² Plaintiff cites *Kern v. United States Bureau of Land Management*, 284 F.3d
25 1062 (9th Cir. 2002), for the proposition that by applying CATEX A3(d) where
26 there is not a NEPA analysis of the underlying rule, DHS is inappropriately relying
27 on a "prior analysis that never occurred." *Kern*, however, concerns circumstances
28 where the agency was attempting to "tier" a project-specific EIS to a non-NEPA
environmental analysis. Here, as noted above, the invocation of CATEX A3(d)
does not rely on any prior analysis.

1 policy that has been in place for years, as each the four challenged rules does here,
2 cannot be an attempt to avoid NEPA review of a single proposed “larger action”
3 because the current amendments were not part of the proposed action at the time
4 the original rule was issued. For example, the 2015 DSO Rule amends a 2002 rule
5 limiting the number of Designated School Officials. DSO00010. These two actions
6 are not improperly segmented from one another, because the 2015 amendment was
7 not part of the 2012 proposal. *See, e.g., O’Reilly*, 477 F.3d at 237 (“improper
8 segmentation is usually concerned with projects that have reached the proposal
9 stage.”). DHS reasonably concluded that each of the four rules were not a “piece
10 of a larger action.” DSO00017, AC2100219, IER00088, STEM000132.

11 **3. The Record Supports DHS’s Conclusion that the Four Rules** 12 **Do Not Have Significant Environmental Effects**

13 Finally, Plaintiffs claim DHS erred in applying CATEX A3(d) because the
14 rules will allegedly cause population growth substantial enough to cause significant
15 environmental impacts. The record belies this claim.

16 **The DSO Rule.** The DSO Rule amends prior regulations to improve the
17 experience of visiting foreign students by giving universities the ability to seek to
18 increase the number of DSOs working at the university and by allowing spouses
19 and children of visiting students to take limited coursework while they are in the
20 country. DSO00009. The record shows that the Rule would not have direct effects
21 on the population. DSOs are already citizens or long-term permanent residents, and
22 increasing their numbers would simply improve oversight of visiting students, not
23 increase the number of individuals entering the country. DSO00010. Similarly,
24 allowing spouses and children to take classes simply increases the opportunities
25 available to members of the family who are entering the country anyway to
26 accompany visiting students. DSO00011. The Rule does not directly increase the
27 number of individuals entering the country.
28

1 Rather than asserting the DSO Rule will directly impact the U.S. population
2 or the environment, Plaintiffs appear to rely on an attenuated theory that the Rule
3 will indirectly induce significant population growth. Specifically, Plaintiffs appear
4 to suggest that by improving the visiting student experience, the Rule will
5 significantly increase the number of foreign students with families desiring to study
6 in the U.S., that a significantly increased number of those students will be permitted
7 to study in the U.S., that an increased number of those students will attempt to stay
8 in the country upon completion of their studies either by seeking permanent resident
9 status or by remaining illegally, and that DHS will grant an increased number of
10 applications for permanent residence or countenance an increased number of
11 individuals remaining illegally in the U.S. And, finally, even if the DSO Rule
12 induced population growth, Plaintiffs’ theory of indirect effects requires the
13 additional speculative assumption that the induced population will settle in places
14 and engage in behaviors causing significant environmental effects.

15 Although NEPA requires agencies to consider indirect effects, this chain of
16 effects—which rests on independent decisions of multiple individuals and
17 agencies—stretches the NEPA duty to examine “reasonably foreseeable” indirect
18 effects well beyond the breaking point. 40 C.F.R. § 1508.8(b). NEPA requires “a
19 reasonably close causal relationship between a change in the physical environment
20 and the effect at issue.” *Presidio Golf Club v. Nat’l Park Serv.*, 155 F.3d 1153, 1163
21 (9th Cir. 1998) (quoting *Metro. Edison Co.*, 460 U.S. at 774). Here the effect of the
22 DSO Rule—improving the study experience for visiting students—does not have
23 “a reasonably close causal relationship” to the environmental effects alleged by
24 Plaintiffs—the harms of population growth. *See also Ground Zero Ctr. for Non-*
25 *Violent Action v. U.S. Dep’t of Navy*, 383 F.3d 1082, 1090 (9th Cir. 2004) (noting
26 agencies “need not discuss remote and highly speculative consequences”). DHS’s
27 conclusion that the Rule would not have significant effects was not arbitrary or
28

1 capricious.

2 **STEM Rule.** The record also demonstrates that the STEM Rule will not have
3 significant direct or indirect effects on the U.S. population. First, the STEM Rule
4 concerns a small group of non-immigrant students, who must leave the country after
5 completion of their practical training period. STEM000086. The STEM Rule thus
6 does not have a significant direct impacts on the U.S. population or the environment

7 Nor is there a basis for concluding that the STEM Rule is likely to indirectly
8 induce significant population growth. First, the record provides no evidence that the
9 Rule is likely to induce significantly more people to participate in STEM practical
10 training programs. DHS observed that while the new longer training period
11 available under the Rule could induce some additional participation, the increased
12 requirements on employers and students could have a countervailing effect and
13 suppress participation. STEM005298. DHS also noted that found that program
14 participation depends on variables outside the control of the DHS and unaffected
15 by the Rule, including the strength of the global economy and the growth of STEM
16 jobs in the U.S. and globally. *Id.* Second, even were the STEM Rule to induce
17 increased participation in STEM practical training programs, there is not the
18 requisite “reasonably close causal relationship” between an increase in participation
19 in the training program and an increase in permanent residence in the United States.
20 As with the DSO Rule, Plaintiffs’ allegation that the STEM Rule will cause
21 population increases rests on an attenuated chain of causation which includes
22 speculation over whether individual program participants will seek to stay in the
23 country (whether by remaining illegally or by seeking more permanent status) and
24 speculation over the decisions of the officials taking enforcement actions or
25 deciding applications for long-term resident status. This attenuated chain of
26 causation stretches well beyond the “reasonably foreseeable” indirect effects that
27 an agency must consider under NEPA, and DHS’s conclusion that the STEM Rule
28

1 would not have significant effects was not arbitrary or capricious.

2 **AC21 Rule.** The administrative record shows that the AC 21 Rule will not
3 have significant impacts on the U.S. population. The record explains that the AC21
4 Rule is designed to improve processes applicable to workers who have already
5 obtained employment-based visas by improving the ability of U.S. employers to
6 hire and retain such workers and increasing the ability of the workers to change
7 positions or employers. AC00142. The Rule does not change the immigrant or
8 nonimmigrant numerical limits set by the Immigration and Naturalization Act, or
9 change the classes of foreign workers who qualify for employment-based visas.
10 AC00157. Thus, DHS concluded that the Rule will not increase U.S. population
11 because “the population affected by this rule is primarily comprised of immigrants
12 and nonimmigrants who are already in the United States and have been present for
13 a number of years.” AC00218. Plaintiffs present no basis for a finding that this
14 conclusion is arbitrary or capricious.

15 To the extent that Plaintiffs assert that the AC21 Rule will induce behavior
16 that will ultimately increase the population, that argument runs aground on the same
17 overly speculative chain of causation present in Plaintiffs’ challenges to the DSO
18 and STEM rules. There is simply not the “reasonably close causal relationship”
19 between the Rule and population growth or environmental effects required to trigger
20 NEPA analysis.

21 **International Entrepreneur Rule.** Finally, the record also demonstrates
22 that DHS reasonably found the International Entrepreneur Rule would not have a
23 significant impact on the overall U.S. population. The International Entrepreneur
24 Rule established criteria under which the Secretary could use his or her
25 discretionary parole authority to allow qualifying individuals to stay temporarily in
26 the United States to oversee his or her start-up business in the United States.
27 IER00041. DHS found this case-by-case adjudicatory process was likely to affect
28

1 fewer than 3,000 individuals, “an insignificant number in the context of the
2 population of the United States.” Plaintiffs point to no record evidence to
3 demonstrate this conclusion was arbitrary or capricious.

4 In sum, DHS’s properly applied CATEX A3(d) to all four rules, and
5 Defendants are entitled to summary judgment on Court IV.

6 **C. DHS Properly Applied CATEX A3(a) to the STEM Rule and the**
7 **International Entrepreneur Rule**

8 In addition to concluding that all four rules fell within CATEX A3(d), DHS
9 found that the International Entrepreneur Rule and the STEM Rule also fell within
10 CATEX A3(a), which covers rules “of a strictly administrative or procedural
11 nature.” DIR00355.¹³ Plaintiffs contend that DHS’s use of CATEX A3(a) is
12 inappropriate because the two rules “made substantive changes to the conditions
13 upon which foreign nationals may enter and remain in the country.” Pl. Br. at 20.¹⁴
14 This claim fails.

15 DHS’s determination that the International Entrepreneur Rule falls within the
16 CATEX A3(a) is reasonable. IER000088. The Immigration and Nationality Act, 8
17 U.S.C. § 1182(d)(5), vests the Secretary of Homeland Security with discretionary
18 authority to parole individuals into the United States temporarily on a case-by-case
19 basis for urgent humanitarian reasons or where parole would be a significant public
20 benefit. IER00041. The International Entrepreneur Rule merely sets forth criteria
21 for the Secretary to consider when determining whether to parole particular
22 individuals based on the public benefit of their entrepreneurial activities. *Id.* The
23 Rule does not alter the Secretary’s substantive discretion to grant or deny parole.

24
25 ¹³ DHS NEPA procedures provide that the proposed action should “clearly fit[]
26 within *one or more* of the CATEXs.” DIR00331 (emphasis added).

27 ¹⁴ Because the two rules are also covered by CATEX A3(d), a finding that DHS
28 misapplied CATEX A3(a) would not invalidate either rule. Plaintiffs must show
invocation of both CATEX A3(a) and A3(d) was arbitrary or capricious.

1 Nor does it create new rights in potential applicants for parole. IER00041, 48. A
2 rule that creates an application process under which the agency can exercise existing
3 discretion is quintessentially administrative in nature and DHS’s decision to invoke
4 CATEX A3(a) was not arbitrary or capricious.

5 DHS’s application of CATEX A3(a) to the STEM Rule was also reasonable.
6 STEM000132-33. The STEM Rule generally authorizes students to continue to
7 engage in an extended period of practical training subject to reporting requirements
8 for students, school officials, and employers that are intended to help DHS track
9 students to limit abuse of the program and safeguard U.S. workers in STEM fields.
10 STEM000057, STEM000086. These reporting provisions fall squarely within the
11 “administrative or procedural” ambit of CATEX A3(a).

12 **V. DHS Prepared Appropriate NEPA Analyses of the Agency’s Actions**
13 **to Address an Increased Influx of Unaccompanied Children and**
14 **Families Across the Southwest Border**

15 Plaintiffs allege that DHS failed to comply with NEPA with regard to its
16 efforts in 2014 to address the need to add additional infrastructure—particularly
17 temporary housing—in response to an influx of families and unaccompanied
18 children crossing the southwestern border. Pl. Br. at 24-25. Specifically Plaintiffs
19 assert DHS was obligated to analyze the impact of “tens of thousands of individuals
20 . . . on the impacts on the ecosystems through which they passed,” and the
21 population impacts of the potential “resettlement” of those individuals. Pl. Br. at
22 25. These claims fail because the DHS infrastructure improvements under review
23 do not *cause* individuals to cross the border into the United States; they are a
24 response to individuals who have already done so. Similarly, the DHS actions under
25 review are not related to whether individuals who have crossed the border will
26 ultimately be permanently resettled in the United States; that determination is based
27 on individual immigration adjudications. Because the “impacts” identified by
28 Plaintiffs are not causally related to the DHS actions at issue, DHS was not

1 obligated to include them in its NEPA analysis, and Defendants are entitled to
2 summary judgment on Count V.

3 In 2014, the United States faced an increase in the number of unaccompanied
4 children and families being apprehended crossing the southwestern border and
5 entering the United States without authorization. UAC01167. This influx created a
6 need to expand DHS's existing infrastructure for safely housing children and
7 families pending the outcome of their immigration proceedings. UAC00534. To
8 analyze the impacts of expanding its infrastructure, DHS prepared a programmatic
9 EA which found that if future projects fell with specified criteria they would not
10 have significant impacts, and DHS therefore issued a FONSI. UAC00534-567,
11 UAC00568-571.

12 Tiering to the programmatic analysis, DHS also prepared a supplemental EA
13 to consider the environmental impacts of construction of a facility outside of Dilley,
14 Texas which would house up to 2,400 women and children pending the disposition
15 of their immigration proceedings. UAC00773-948.¹⁵ In its supplemental EA DHS
16 considered the impacts of the housing facility on a wide range of resources,
17 including land use patterns, water, air, climate change, and wildlife. UAC00779-
18 813. In addition to the direct impacts of the 2,400 people living in the facility while
19 awaiting their judicial proceedings, DHS considered the impacts of the facility on
20 the population of Dilley and Frio County and concluded that while there would be
21 a short-term increase in population as the facility was constructed the overall impact
22 would not be significant. UAC00808. Concluding that the project would not have
23 significant environmental impacts, DHS issued a FONSI. UAC00769 (FONSI).

24 NEPA requires that an agency disclose the effects, both direct and indirect,
25 that are *caused by* its proposed action. Direct effects” are “caused by the action and

26 ¹⁵ “Tiering” refers the coverage of general matter in a broad environmental analysis
27 with subsequent narrower statements focusing solely on the issues specific to the
28 subsequent proposal. 40 C.F.R. § 1508.28.

1 occur at the same time and place.” 40 CFR § 1508.8(a). “Indirect effects” are
2 “caused by the action and are later in time or farther removed in distance, but are
3 still reasonably foreseeable.” 40 CFR § 1508.8(b). The test of whether an effect is
4 reasonably foreseeable is measured similarly to the tort law’s proximate cause
5 doctrine—whether there is a “reasonably close causal relationship” between the
6 agency’s action and the environmental effect. *Public Citizen*, 541 U.S. 752; *see also*
7 *Ctr. for Biological Div. v. BLM.*, 937 F. Supp. 2d 1140 (N.D. Cal. 2013).

8 The impacts individuals have as they cross the border and the impacts of
9 potential resettlement of those individuals are not *caused* directly or indirectly by
10 DHS’s decision to construct a housing facility in Dilley, Texas. To the contrary, the
11 purpose of the facility is to *respond* to individuals who have already determined to
12 cross the border and the need to house those individuals pending resolution of their
13 immigration proceedings. *See* UAC00776 (The purpose of the action is to “rapidly
14 provide appropriate housing requirements for family units as part of the
15 Department’s overall response to the influx of unaccompanied children . . . and
16 family units across the southwest border.”); UAC00547 (“The need for the
17 Proposed Action is based on the existing and expected increase in the number of
18 apprehended persons being processed that may exceed the then current capacity of
19 the DHS support infrastructure.”). In other words, the DHS facility challenged by
20 Plaintiffs is not the *cause* of increased border crossings but their *effect*.

21 Nor was DHS required to consider—as an impact of a proposal to build
22 temporary housing—the impacts of the “potential resettlement” of individuals
23 crossing the border. Pl. Br. at 25. As noted above, the Supplemental EA
24 appropriately discloses the impacts of housing approximately 2,500 people at the
25 Dilley facility while their immigration proceedings are pending. But predicting the
26 outcome of those individual immigration proceeding—i.e. how many individuals
27 will ultimately be allowed to stay in the United States or will be returned to their
28

1 country of origin, and if allowed to stay, where in the United States they might
2 settle—would be a speculative endeavor well outside of DHS’s NEPA obligations.
3 *Warm Springs Task Force v. Gribble*, 621 F.2d 1017, 1026 (9th Cir. 1980) (NEPA
4 does not require discussion of “remote and highly speculative consequences.”).

5 Because DHS fully complied with NEPA in analyzing its proposal to add
6 infrastructure in response to an influx of families and children crossing the
7 southwestern border, the agency is entitled to summary judgment on Count V.

8 **VI. Plaintiffs’ Requested Remedy is Overbroad and Premature**

9 Plaintiffs broadly ask that the Court vacate CATEX A3, all of “its
10 invocations,” and the 2014 NEPA analyses underlying the Dilley Facility. Pl. Br. at
11 25. This request is unwarranted and inappropriate. Vacatur is not automatically
12 imposed upon a finding of a legal defect in an agency’s analysis. *Cal. Communities*
13 *Against Toxics v. EPA*, 688 F.3d 989, 992 (9th Cir. 2012). To the contrary, vacatur
14 is an equitable remedy that requires a court to balance “how serious the agency’s
15 errors are” against the “disruptive consequences” of vacating the decision. *Id.* In
16 this case, the rules at issue have been in place and relied on by DHS and numerous
17 third parties for years, and the Dilley facility has been constructed and is in use.
18 Under these circumstances, a broad vacatur order would be highly disruptive.
19 Therefore, while Defendants believe the decisions before the Court should be
20 upheld, if the Court finds any violation of law, we request further briefing on
21 remedy so that the Court is afforded the opportunity to weigh the equities and
22 determine whether vacatur is appropriate.

23 May 24, 2019

Respectfully Submitted,

24 LAWRENCE VANDYKE

25 Deputy Assistant Attorney General

26 /s/ Barclay T. Samford
