NOTICE OF MOTION AND MOTION

TO PLAINTIFFS AND THEIR COUNSEL OF RECORD, PLEASE TAKE NOTICE

THAT on June 30, 2022, at 10:00 a.m., or as soon thereafter as counsel may be heard, in Courtroom 11 of the United States District Court for the Northern District of California, San Francisco Division, located at 450 Golden Gate Avenue, 19th Floor, San Francisco, California 94102, Defendants BlueTriton Brands, Inc. (“BTB”), the Coca-Cola Company (“Coca-Cola”), and Niagara Bottling, LLC (“Niagara”) (collectively, “Defendants”) hereby move pursuant to the Court’s March 8, 2022 Minute Order (Dkt. No. 68) and pursuant to Federal Rules of Civil Procedure 12(b)(1) and 12(b)(6) for an order dismissing these actions with prejudice on the grounds that Plaintiffs lack Article III standing and that they fail to state a claim.

1 **I. INTRODUCTION**¹

2 Plaintiffs in these putative class actions base their claims on their own novel re-definition
3 of a well-understood term. Plaintiffs do not deny that Defendants’ water bottles can be, and are,
4 recycled. Yet Plaintiffs claim that labeling the bottles as “100% Recyclable” is deceptive because
5 not every bottle will be recycled. Common sense, federal labeling guidance, and California law
6 are consistent: *Recyclable* means *able* to be recycled. Plaintiffs’ thesis that “recyclable” is to be
7 read as a guarantee that each and every bottle will *ultimately be recycled* is thus inconsistent with
8 federal guidelines and California law, and begs credulity. Because this erroneous definition
9 underpins each of Plaintiffs’ claims against all Defendants, their claims all fail.

10 The Federal Trade Commission’s (“FTC”) Green Guides, which govern marketing claims
11 about recyclability, recognize that the phrase “recyclable” means that a product “*can be* collected,
12 separated, or otherwise recovered from the waste stream through an established recycling program
13 for reuse or use in manufacturing or assembling another item.” 16 C.F.R. § 260.12. Defendants’
14 “100% Recyclable” labels comport with these FTC guidelines; Plaintiffs never allege that the
15 products at issue are made from materials that *cannot* be recycled. Plaintiffs make general
16 allegations about *nationwide* recycling capacity for *all* plastics, but fail to allege any facts regarding
17 the recyclability of Defendants’ bottles, caps, or labels *specifically* and fail to allege any facts
18 regarding the recyclability of PET water bottles *in California*, which has a California Redemption
19 Value (“CRV”) beverage container redemption program (and thus redemption and recycling
20 infrastructure not found in most other states).

21 In the few specific allegations they do make, Plaintiffs admit that Defendants’ bottles are
22 made of the “most recyclable” plastics available. Whether a given recyclable bottle is ultimately
23 repurposed depends on numerous factors beyond Defendants’ control—including, above all,
24 consumers’ willingness to place the bottles in the recycling stream. Those and countless other
25 external factors might affect whether a given bottle is recycled, but they do not change the fact that
26 the bottle is able to be recycled. Perhaps for this reason, the Consolidated Amended Complaint

27 _____
28 ¹ Unless otherwise stated, all emphasis is added and citations and internal quotation marks are omitted.

1 (“CAC”) fails to allege that anyone other than the named plaintiffs accepts their idiosyncratic
2 definition of “recyclable” as meaning that every last container will be recovered and repurposed.

3 In California, the Green Guides are more than commonsense guidance based on the FTC’s
4 consumer surveys—they are *the* authority on recyclability claims according to California law,
5 which expressly permits representations that follow the Green Guides. This law sinks Plaintiffs’
6 general consumer-fraud theories. California lawmakers enacted the Environmental Marketing
7 Claims Act (“EMCA”), Cal. Bus. & Prof. Code § 17580.5, to govern marketing statements
8 involving the term “recyclable.” That statute is the *exclusive* California law defining “recyclable,”
9 superseding all other consumer protection laws. In other words, Plaintiffs cannot deploy general
10 consumer-fraud theories under the UCL, CLRA, FAL, or common law to claim deception based
11 on a *different* definition of “recyclable” than the EMCA’s—as they do here.

12 Plaintiffs’ claims fail for other reasons, too. They impermissibly lump Defendants’
13 products together and fail to identify with the requisite specificity which allegations pertain to
14 which Defendants’ products. They fail to plead requisite elements of their CLRA, FAL, fraud,
15 negligent misrepresentation, and UCL claims. Plaintiffs also fail to adequately allege Article III
16 standing because they have suffered no injury and do not allege that their expectations were not
17 met with respect to the specific bottles they purchased, and lack standing to seek injunctive relief
18 because they have not alleged the requisite threat of prospective harm.

19 Plaintiffs’ deficient claims boil down to their dissatisfaction with the nation’s recycling
20 infrastructure and the market for recycled material. Neither their dissatisfaction nor alternative
21 definition of “recyclable” creates an actionable claim. The Court should dismiss the CAC.

22 **II. STATEMENT OF ISSUES TO BE DECIDED**

- 23 1. Have Plaintiffs sufficiently pleaded a violation of any of the consumer protection laws based
24 on a definition of “recyclable” consistent with the FTC’s Green Guides definition, which the
25 California legislature incorporated into the Business & Professions Code?
- 26 2. Have Plaintiffs failed to plead that Defendants’ “100% Recyclable” labeling is false or
27 misleading?

- 1 3. Would a reasonable consumer interpret “100% Recyclable” to mean that Defendants’ water
2 bottles *definitely will* be recycled?
- 3 4. By making group pleadings about all Defendants’ products and making few allegations about
4 any specific product, do Plaintiffs satisfy Rule 9(b)?
- 5 5. Do additional, claim-specific defects warrant dismissal?
- 6 6. Do Plaintiffs (i) satisfy the standing requirements of Article III when they do not and cannot
7 allege that the products they purchased failed to satisfy their expectations, and do they (ii) have
8 Article III standing to seek injunctive relief when they cannot plausibly be “deceived” by the
9 label in the future?

10 **III. STATEMENT OF RELEVANT FACTS**

11 These are two consolidated cases in a series of putative class actions alleging similar claims
12 about the recyclability of plastic packaging. Plaintiffs sue the Coca-Cola Company (“Coca-Cola”),
13 BlueTriton Brands, Inc. (“BTB”), and Niagara Bottling, LLC (“Niagara”) (collectively,
14 “Defendants”), alleging that Defendants’ “100% Recyclable” representations on their water bottles
15 are false and misleading.² See CAC ¶¶ 40–68.

16 The CAC relies mostly on collective allegations against all Defendants and offers only
17 limited detail about specific products. Plaintiff Swartz alleges that, in November 2020, he
18 purchased a bottle of Arrowhead water in California bearing a “100% Recyclable” label in part
19 because of the text of the label. *Id.* ¶ 88. Plaintiffs Muto and Salgado claim that, in April 2021,
20 they purchased Coca-Cola’s Dasani Purified Water in part because of the “100% Recyclable”
21 statement on the bottle. *Id.* ¶¶ 86–87. Plaintiff Salgado also claims that she purchased a Niagara
22 product in April 2020 with a similar label statement. *Id.* ¶ 87.

23 Plaintiffs allege that the “100% Recyclable” representations on Defendants’ labels are false,
24 violate California public policy and the FTC’s Green Guides, and defraud the public because

25 _____
26 ² Plaintiffs allege five causes of action: (1) violation of the Consumers Legal Remedies Act, Cal.
27 Civ. Code § 1750, *et seq.* (“CLRA”), (2) false advertising under Cal. Bus. & Prof. Code § 17500,
28 *et seq.* (“FAL”), (3) fraud, deceit, and misrepresentation, (4) negligent misrepresentation, and (5)
unfair, unlawful, and deceptive trade practices, Cal. Bus. & Prof. Code § 17200, *et seq.* (“UCL”).

1 Defendants’ bottles are not “100% Recyclable” under Plaintiffs’ definition of “recyclable.”
2 According to Plaintiffs, a “recyclable” product “*must*, if discarded into a recycling bin, be: (i)
3 accepted for collection by a recycling facility; and (ii) processed for reuse or use in manufacturing
4 another item.” *Id.* ¶ 40. In other words, according to Plaintiffs, a product is recyclable only if it *is*
5 recycled.

6 But that is not how “recyclable” is defined in the FTC’s Green Guides. Rather, a product
7 is recyclable—and can be labeled as such—if it “*can be* collected, separated, or otherwise recovered
8 from the waste stream through an established recycling program for reuse or use in manufacturing
9 or assembling another item.” 16 C.F.R. § 260.12(a). The Green Guides permit the use of
10 unqualified “recyclable” claims if “recycling facilities are available” to at least 60% “of consumers
11 or communities where the item is sold.” *Id.* § 260.12(b)(1). As Plaintiffs themselves allege,
12 consumers and communities in California have access to at least 75 Materials Recovery Facilities
13 (“MRFs”) that process recyclable materials, including the materials Plaintiffs allege comprise
14 Defendants’ bottles, caps, and labels. *See* CAC ¶ 41 (PET, HDPE, and PP sorted in sink-float tank).
15 Plaintiffs do not allege that any of Defendants’ California consumers or communities—let alone
16 more than 40% of them—lack access to “recycling facilities.” Therefore, Plaintiffs fail to allege
17 that Defendants inappropriately label their bottles as “100% Recyclable.” By relying on their own
18 invented definition, Plaintiffs ask the Court to rewrite the California law and impose a definition of
19 recyclability that the legislature neither considered nor codified.

20 Plaintiffs also ask the court to rely on portions of California law not in effect at the time
21 they allegedly purchased the products at issue. Plaintiffs reference proposed amendments to
22 California’s recycling law in Senate Bill 343 concerning recyclability claims and recordkeeping
23 requirements. CAC ¶¶ 74–75. Those provisions are inapplicable here. The amendments were
24 signed into law on October 5, 2021 and do not apply for years, let alone retroactively to the
25 purchases at issue. CAC ¶¶ 86–88 (alleging Plaintiffs purchased products in April 2020 and April
26 2021); Cal. Pub. Res. Code § 42355.51(b)(2)(A) (new restrictions on representations of
27 recyclability do not apply to “[a]ny product or packaging that is manufactured up to 18 months
28

1 after the date the department publishes the first material characterization study” or “before January
2 1, 2024, whichever is later”).³

3 Moreover, while Plaintiffs’ CAC theorizes about the probability that a given bottle will or
4 will not be recycled, it never alleges what happened to the specific bottles that Plaintiffs deposited
5 in their recycling bins. Although Plaintiffs cite a Greenpeace report to insinuate that their bottles
6 stood roughly a 20% chance of reuse, that report pre-dated Plaintiffs’ purchases by several years
7 and purported to assess recycling capacity nationwide, not in California or in Plaintiffs’ community.
8 CAC ¶¶ 41–44. Accordingly, the CAC not only lacks factual allegations suggesting that
9 Defendants’ bottles are not 100% *recyclable*, but also lacks allegations that the bottles Plaintiffs
10 purchased were not *actually recycled*.

11 Although each of Plaintiffs’ claims concerns a different product, a different defendant, and
12 a different purported injury, Plaintiffs attempt to tie them together with the conclusory assertion
13 that Defendants’ independent use of the phrase “100% Recyclable” on their respective products
14 reflects a coordinated “marketing campaign” to mislead the public. *Id.* ¶ 67. But the factual
15 allegations supporting this claim are scant and altogether insufficient. Plaintiffs observe that the
16 trade group American Beverage Association (“ABA”) participated in a 2019 publicity campaign to
17 promote the recycling of plastics, including by encouraging its members to consider “voluntary on-
18 pack messag[ing]” about recyclability. *Id.* ¶¶ 58–65. Any recyclability-related claim that appeared
19 on beverage containers during this period is alleged to be part of an ABA-led “coordinated scheme
20 to defraud the public.” *Id.* ¶ 65. Plaintiffs fail, however, to allege any facts suggesting that Niagara,
21 BTB, or Coca-Cola had anything to do with the ABA campaign. Plaintiffs also do not allege that
22 Defendants—with their different products—communicated or cooperated with one another with
23 regard to their claims of recyclability, or that the introduction of “100% Recyclable” on
24 Defendants’ packaging coincided with the ABA initiative.

25
26
27 ³ One of Plaintiffs’ quoted provisions, Cal. Bus. & Prof. Code § 17580(a), imposes a recordkeeping
28 requirement. But Plaintiffs have failed to allege any noncompliance.

1 **IV. LEGAL STANDARD**

2 To survive a Rule 12(b)(6) motion to dismiss, “a complaint must contain sufficient factual
 3 matter, accepted as true, to state a claim to relief that is plausible on its face.” *Ashcroft v. Iqbal*,
 4 556 U.S. 662, 678 (2009). “[A] plaintiff’s obligation to provide the grounds of his entitle[ment] to
 5 relief requires more than labels and conclusions, and a formulaic recitation of the elements of a
 6 cause of action will not do.” *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 555 (2007). While the
 7 Court must accept well-pleaded facts as true, it need not accept “allegations that are merely
 8 conclusory, unwarranted deductions of fact, or unreasonable inferences.” *In re Gilead Scis. Sec.*
 9 *Litig.*, 536 F.3d 1049, 1055 (9th Cir. 2008). Instead, the allegations in the complaint “must be
 10 enough to raise a right to relief above the speculative level.” *Twombly*, 550 U.S. at 555. Because
 11 all of Plaintiffs’ claims here sound in fraud, Plaintiffs must also satisfy Rule 9(b)’s heightened
 12 pleading standard.⁴ To do so, they must sufficiently allege “the who, what, when, where, and how”
 13 of the fraud. *TransFresh Corp. v. Ganzerla & Assoc., Inc.*, 862 F. Supp. 2d 1009, 1017 (N.D. Cal.
 14 2012). Any such claim must be “specific enough to give defendants notice of the particular
 15 misconduct which is alleged to constitute the fraud charged so that they can defend against the
 16 charge.” *Id.*

17 Plaintiffs must also establish that they have constitutional standing, pleading an “injury in
 18 fact that is fairly traceable to the defendant’s conduct and that is likely to be redressed by a favorable
 19 judicial decision.” *Bank of Am. Corp. v. City of Miami*, 137 S. Ct. 1296, 1302 (2017).

20 //

21 //

22 //

23 //

24 //

25 ⁴ Courts routinely apply Rule 9(b) to similar causes of action. *Beecher v. Google N. Am. Inc.*, 2018
 26 WL 4904914, at *1 (N.D. Cal. Oct. 9, 2018) (UCL, FAL, and CLRA); *TransFresh Corp. v.*
 27 *Ganzerla & Assoc., Inc.*, 862 F. Supp. 2d 1009, 1015 (N.D. Cal. 2012) (Greenwashing and UCL);
 28 *Neilson v. Union Bank of Cal., N.A.*, 290 F. Supp. 2d 1101, 1141 (C.D. Cal. 2003) (fraud and
 negligent misrepresentation).

1 **V. ARGUMENT**

2 **A. The incorporation of the Green Guides definition into the Business &**
3 **Profession Code for “recyclable” labeling supersedes any other definition.**

4 California law is far from silent on what “recyclable” means. Plaintiffs’ claims of deceptive
5 environmental marketing all fail because they hinge on a definition of “recyclable” that differs from
6 the Green Guides, which is the *exclusive* standard for such claims in California. California
7 lawmakers enacted the EMCA, Cal. Bus. & Prof. Code § 17580.5, for the specific purpose of
8 governing environmental marketing claims, including what qualifies as “recyclable.” The statute
9 expressly defines an “environmental marketing claim” as any claim “contained in the [Green
10 Guides] published by the Federal Trade Commission.” *Id.* § 17580.5(a). The statutory text then
11 makes crystal clear that compliance with the Green Guides provides a complete defense to any
12 claim of violation: “It shall be a defense to any suit or complaint brought under this section that
13 the person’s environmental marketing claims conform to the standards or are consistent with the
14 examples contained in the [Green Guides].” *Id.* § 17580.5(b). The Green Guides, in turn, are
15 explicit that whether a product may be labeled as “recyclable” hinges on whether the item is
16 accepted for recycling by existing recycling programs, not, as Plaintiffs urge, on whether every unit
17 of the product is, in fact, recycled. The Green Guides state that a product may “be marketed as
18 recyclable [if] it can be collected, separated, or otherwise recovered from the waste stream through
19 an established recycling program for reuse or use in manufacturing or assembling another item.”
20 16 C.F.R. § 260.12(a).

21 Because lawmakers designed the EMCA to address the specific kind of claims at issue here,
22 it bars Plaintiffs’ attempt to impose a *different* definition of “recyclable” under the UCL, FAL, and
23 CLRA, all of which are more general statutes. “[I]t is a commonplace of statutory construction that
24 the specific governs the general.” *N.L.R.B. v. SW Gen., Inc.*, 137 S. Ct. 929, 941 (2017). The
25 legislature’s chosen definition also precludes Plaintiffs’ common law claims, each of which turns
26 on an alleged meaning of “recyclable” different from that in the Green Guides. *See Verdugo v.*
27 *Target Corp.*, 59 Cal. 4th 312, 326 (2014) (when the legislature uses “much clearer and more
28

1 explicit statutory language” it reflects an intention “entirely to preclude the imposition of
 2 liability . . . under common law principles”). The Court should therefore dismiss the UCL, FAL,
 3 CLRA, fraud, and negligent misrepresentation claims as based on a “recyclable” definition that is
 4 inconsistent with the EMCA. *See* CAC ¶¶ 106, 112, 125, 135, 144, 146.

5 **B. Plaintiffs fail to sufficiently plead that Defendants’ “100% Recyclable” labeling**
 6 **is false or misleading.**

7 Plaintiffs’ conclusory allegations that Defendants’ products are not “100% Recyclable” are
 8 based on generalized allegations about nationwide recycling practices that say nothing specific
 9 about Defendants’ products or recycling practices *in California*. Because Plaintiffs’ factual
 10 allegations do not plausibly support a violation of California’s definition of “recyclable,” all of their
 11 claims must be dismissed. *Iqbal*, 556 U.S. at 678; *Twombly*, 550 U.S. at 555.

12 California’s adoption of the FTC’s definition of “recyclable” requires Plaintiffs to plausibly
 13 allege that, for at least 60% of California consumers or communities in which Defendants’ products
 14 are sold, there are no “recycling facilities . . . available” to collect, separate, or otherwise recover
 15 from the waste stream the materials in Defendants’ packaging. *See* 16 C.F.R. § 260.12(a), (b)(1).
 16 The Green Guides permit the use of the term “recyclable” on any packaging that “*can be* collected,
 17 separated, or otherwise recovered from the waste stream through an established recycling program
 18 for reuse or use in manufacturing or assembling another item.” *Id.* § 260.12(a). The Green Guides
 19 allow the use of “recyclable” without restriction if “recycling facilities are available to a substantial
 20 majority [60%] of consumers or communities” where the item is sold. *Id.* § 260.12(b)(1).
 21 Therefore, to assert a violation of California’s definition of “recyclable,” Plaintiffs must plead facts
 22 showing that, in at least 40% of the California communities in which Defendants’ products labeled
 23 “100% Recyclable” are sold, there are no established recycling programs to recover the bottles,
 24 caps, or labels from the waste stream. Plaintiffs fail to do so.

25 Ignoring that the definition of “recyclable” centers on the availability of recycling facilities
 26 in specific communities, Plaintiffs rest their allegations on the capability of *existing* recycling
 27 facilities *nationwide* to convert the collected PET, HDPE, and PP/BOPP into new plastics. These
 28

1 allegations rely entirely on inferences drawn from public reports discussing general recycling
2 practices in the United States. *See* CAC ¶¶ 40–45, 42 nn.7, 8 (citing Greenpeace report and
3 plasticpollutioncoalition.org blog post). But the allegations drawn from these sources fail to
4 plausibly indicate that Defendants’ bottles, caps, and labels are not collected by California’s
5 recycling programs. Plaintiffs theorize that, “[a]lthough the Products *may be accepted for recycling*
6 *by some curbside programs,*” MRFs allegedly lack the capacity to process the packaging into new
7 plastics. *Id.* ¶ 50. Plaintiffs allege that as of 2017, nationwide MRFs had limited capacity to
8 process PET and HDPE and that contamination and processing issues further reduce the amount of
9 PET and HDPE converted to new plastics. *Id.* ¶ 42. But they fail to allege that the 2017 data is
10 still accurate, that it applies to *California* MRFs, or that the same contamination and processing
11 issues affecting plastics in general also exist for Defendants’ bottles. Relying on the Greenpeace
12 report, Plaintiffs assert that PP and BOPP plastics are generally too expensive to recycle in the
13 United States due to limited demand. *Id.* ¶¶ 43–44. But Plaintiffs say nothing about the capabilities
14 of *California* MRFs and never allege that Defendants’ PP or BOPP labels are among the materials
15 that those MRFs decline to recycle. *Id.* ¶ 43 & nn.10, 11 (citing Greenpeace report).⁵ Further,
16 Plaintiffs concede that 75 of the nation’s 365 MRFs are in California. *Id.* ¶ 41. Plaintiffs, moreover,
17 allege that MRFs generally utilize float tanks to separate HDPE and PP from PET plastics,
18 conceding that MRFs are capable of removing all three types of plastics from the waste stream. *Id.*
19 The alleged lack of market demand for PP and BOPP plastics does not mean MRFs cannot process
20 those materials.

21
22 ⁵ The Greenpeace report is incorporated by reference into the CAC. *See* CAC ¶¶ 42 & n.7, 43
23 nn.10, 11; *Branch v. Tunnell*, 14 F.3d 449, 454 (9th Cir. 1994), *overruled on other grounds by*
24 *Galbraith v. Cnty. of Santa Clara*, 307 F.3d 1119 (9th Cir. 2002) (incorporation by reference
25 permits the court to consider documents “whose contents are alleged in a complaint and whose
26 authenticity no party questions, but which are not physically attached to the pleading”); *Khoja v.*
27 *Orexigen Therapeutics, Inc.*, 899 F.3d 988, 1002 (9th Cir. 2018) (incorporation by reference
28 “prevents plaintiffs from selecting only portions of documents that support their claims, while
omitting portions of those very documents that weaken—or doom—their claims”); *see also*
Greenpeace, Circular Claims Fall Flat: Comprehensive U.S. Survey of Plastic Recyclability (2020)
<https://www.greenpeace.org/usa/wp-content/uploads/2020/02/Greenpeace-Report-Circular-Claims-Fall-Flat.pdf>.

1 The Green Guides do not require “recyclable” claims to be backed by a pledge that recycling
 2 facilities *will* convert every gram of recyclable material into recycled plastics. Because Plaintiffs
 3 do not plausibly allege that 60% of consumers of Defendants’ products lack access to recycling
 4 facilities that collect and process bottles, caps, and labels, Plaintiffs’ allegations fail to support a
 5 plausible inference that the “100% Recyclable” statements deviate from California’s “recyclable”
 6 definition. *See Twombly*, 550 U.S. at 555.

7 C. Reasonable consumers would not interpret “100% Recyclable” to mean that
 8 every bottle is recycled.

9 Plaintiffs not only seek to rewrite California law, but plain English as well. Plaintiffs’
 10 claims all stem from their own invented definition of “recyclable”: not that a plastic bottle *is*
 11 *capable of being* recycled, but that it *will be* recycled. That tortured interpretation contradicts the
 12 word’s plain meaning, reasonable consumers’ understanding of it, and federal guidelines for its use
 13 in advertising. That is, even if Plaintiffs sufficiently alleged that “100% Recyclable” does not
 14 comply with the Green Guides, they must also plead, for all their claims, that the “100% Recyclable”
 15 claim is “likely to mislead” or “likely to deceive” reasonable consumers. *See Colgan v. Leatherman*
 16 *Tool Grp., Inc.*, 135 Cal. App. 4th 663, 680 (2006); *Lavie v. Procter & Gamble Co.*, 105 Cal. App.
 17 4th 496, 508 (2003); *Ebner v. Fresh, Inc.*, 838 F.3d 958, 965 (9th Cir. 2016) (CLRA, UCL, and
 18 FAL); *Freeman v. Time, Inc.*, 68 F.3d 285, 289 (9th Cir. 1995) (fraud); *Girard v. Toyota Motor*
 19 *Sales, U.S.A., Inc.*, 316 F. App’x 561, 562 (9th Cir. 2008) (“justifiable reliance” element of
 20 negligent misrepresentation same as “reasonable consumer” standard); *Hill v. Roll Int’l Corp.*, 195
 21 Cal. App. 4th 1295, 1304 (2011) (EMCA must satisfy reasonable consumer test “as expressed in
 22 the FTC guides . . . and as used in our state’s consumer laws”).

23 This “reasonable consumer” test requires Plaintiffs to plead not only their *own* belief that
 24 they were misled but “a probability that a significant portion of the general consuming public or of
 25 targeted consumers, acting reasonably in the circumstances, could be misled.” *People ex rel. Dep’t*
 26 *of Motor Vehicles v. Cars 4 Causes*, 139 Cal. App. 4th 1006, 1016 (2006); *Hadley v. Kellogg Sales*
 27 *Co.*, 243 F. Supp. 3d 1074, 1092–93 (N.D. Cal. 2017). It is not enough to plead that 100%

1 Recyclable “might conceivably be misunderstood by some few consumers viewing it in an
2 unreasonable manner.” *Lavie*, 105 Cal. App. 4th at 508. Nor is it enough to plead that the three
3 named plaintiffs shared the same interpretation. *See id.*; *see also Moore v. Trader Joe’s Co.*, 4
4 F.4th 874, 881–85 (9th Cir. 2021).

5 Courts regularly dismiss claims where, as here, plaintiffs fail to plead any basis for
6 concluding that a *significant portion* of consumers—not just “some” consumers—would
7 understand the statements to mean what plaintiffs suggest. *See, e.g., Becerra v. Dr Pepper/Seven*
8 *Up, Inc.*, 945 F.3d 1225, 1227–31 (9th Cir. 2019) (holding “no reasonable consumer would believe
9 that the word ‘diet’ in a soft drink’s brand name promises weight loss or healthy weight
10 management” rather than “fewer calories”); *Moore*, 4 F.4th at 881–85 (reasonable consumer would
11 not understand phrase “100% New Zealand Manuka Honey” to promise product contained only
12 manuka pollen); *Carrea v. Dreyer’s Grand Ice Cream, Inc.*, 475 F. App’x 113, 115 (9th Cir. 2012)
13 (reasonable consumer would not believe that ice cream is healthier than others solely because of
14 “Original” and “Classic” descriptors); *Forouzes v. Starbucks Corp.*, 2016 WL 4443203, at *3
15 (C.D. Cal. Aug. 19, 2016) (reasonable consumer would know that iced tea contains ice); *Nowrouzi*
16 *v. Maker’s Mark Distillery, Inc.*, 2015 WL 4523551, at *7 (S.D. Cal. July 27, 2015) (reasonable
17 consumer would not think “handmade” meant no equipment or automated process used to
18 manufacture whiskey); *Red v. Kraft Foods, Inc.*, 2012 WL 5504011, at *3 (C.D. Cal. Oct. 25, 2012)
19 (reasonable consumer would “be familiar with the fact of life that a cracker is not composed of
20 primarily fresh vegetables”).

21 Here, Plaintiffs allege no plausible facts to suggest that a reasonable consumer would
22 believe that a “recyclable” product “must, if discarded into a recycling bin, be . . . processed for
23 reuse or use in manufacturing another item” or that “100% Recyclable” means the entirety of the
24 packaging could *and would* be recycled once deposited in a recycling bin. CAC ¶ 40. Plaintiffs
25 contend that “100% Recyclable” guarantees that every bit of plastic from a “100% Recyclable”
26 bottle will *always* be recycled—an impossibility given that a tiny fraction of bottles may be lost or
27 mishandled in transport or processing. Courts routinely reject unreasonable consumer

1 interpretations, like the one Plaintiffs advance here. *See Kraft Foods*, 2012 WL 5504011, at *3;
2 *Moore*, 4 F.4th at 883 (“A reasonable consumer would not understand [defendant’s] label here as
3 promising something that is impossible to find.”); *Jessani v. Monini N. Am., Inc.*, 744 F. App’x 18,
4 19–21 (2d Cir. 2018) (affirming dismissal of a claim relating to truffle-flavored olive oil because
5 reasonable consumers would not expect a “mass produced, modestly priced olive oil” to be made
6 with real truffles).

7 Underlining the implausibility of Plaintiffs’ claim is the Green Guides’ definition of
8 “recyclable.” Even if the FTC’s Green Guides did not control the definition of recyclable, *supra*
9 Section V.A, they specifically address how reasonable consumers understand the term “recyclable.”
10 The FTC intended to give guidance to marketers to avoid practices that likely mislead reasonable
11 consumers.⁶ The contradiction between Plaintiffs’ proffered definition of “recyclable” and the
12 definition found in the Green Guides, *see supra* Section V.B, sinks Plaintiffs’ claims. *See Newton*
13 *v. Kraft Heinz Foods Co.*, 2018 WL 11235517, at *9 (E.D.N.Y. Dec. 18, 2018) (dismissing “natural”
14 claim as “so inconsistent with current federal law, that it fails to comport with reality”).

15 Finally, Plaintiffs’ definition defies common sense. Any reasonable person would
16 understand “recyclable” to mean “capable of being recycled.” That is, reasonable consumers
17 understand that a recyclable item might not, in fact, be recycled—just as an edible item might not
18 be eaten and a flammable item might not be lit ablaze. This common sense understanding of
19 “recyclable” is consistent with the dictionary definition of the term. *Recyclable*, Cambridge
20 Dictionary, <https://dictionary.cambridge.org/us/dictionary/english/recyclable> (last visited Apr. 20,
21 2022) (defining “recyclable” as “able to be recycled”). Plaintiffs cannot clear the plausibility
22 threshold by interpreting words in a manner contrary to their “common definition and
23 understanding.” *Cheslow v. Ghirardelli Chocolate Co.*, 445 F. Supp. 3d 8, 17 (N.D. Cal. 2020)
24 (dismissing complaint premised on interpretation of “white” on a confectionery product as

25 ⁶ When fashioning the Green Guides, the FTC relied on consumer survey data to make
26 determinations “based on how consumers reasonably interpret claims” and considered the views of
27 consumers with a range of sophistication. Fed. Trade Comm’n, *The Green Guides: Statement of*
28 *Basis and Purpose* 24, 218, 241, <https://www.ftc.gov/sites/default/files/attachments/press-releases/ftc-issues-revised-green-guides/greenguidesstatement.pdf>.

1 guaranteeing “white chocolate”). In fact, every single reference that Plaintiffs cite in the CAC—
 2 including the Green Guides and the Greenpeace report—embraces the universal understanding that
 3 “recyclable” means “able to be recycled.” Plaintiffs have identified no authority that supports their
 4 tortured construction of the term.

5 Because Plaintiffs fail to show that a significant portion of reasonable consumers could have
 6 been confused by “100% Recyclable,” they fail to state any claim. *Becerra*, 945 F.3d at 1230.

7 **D. Plaintiffs fail to meet Rule 9(b) pleading standards.**

8 Plaintiffs barely allege anything specific about Defendants’ separate products and instead
 9 impermissibly lump all of Defendants’ products together. Rule 9(b) “does not allow a complaint
 10 to merely lump multiple defendants together but require[s] plaintiffs to differentiate their
 11 allegations when suing more than one defendant . . . and inform each defendant separately of the
 12 allegations surrounding his alleged participation in the fraud.” *Swartz v. KPMG LLP*, 476 F.3d 756,
 13 764–65 (9th Cir. 2007). The CAC makes blanket statements about *all* of Defendants’ various
 14 products without differentiating them, alleging in conclusory terms that the “100% Recyclable”
 15 statements are false. *See, e.g.*, CAC ¶ 50. And contrary to Plaintiffs’ allegation that “Defendants”
 16 have launched the “Every Bottle Back” initiative to market their products as “100% Recyclable,”
 17 *id.* ¶ 58, they do not allege that any specific defendant participated in or was affiliated with that
 18 initiative.⁷ Under Rule 9(b), Plaintiffs cannot rely on these broad-brush, conclusory statements,
 19 and the claims should accordingly be dismissed. *Swartz*, 476 F.3d at 764–65.

20 **E. Additional, claim-specific defects warrant dismissal.**

21 As explained *supra* Section V.B–D, all of Plaintiffs’ claims should be dismissed because
 22 Plaintiffs fail to allege an actionable misrepresentation. Certain claims should also be dismissed
 23 for the following claim-specific reasons.

24
 25
 26 ⁷ Nor could they allege all Defendants’ participation. For example, BTB never participated in this
 27 initiative. American Beverage Association, *Every Bottle Back | Innovation Naturally*,
 28 <https://www.innovationnaturally.org/plastic/> (listing corporate participants). The “Every Bottle
 Back” website is incorporated by reference into the CAC. *See* CAC ¶¶ 58, 61, 65; *supra* note 5.

1 **1. Fraud, deceit, and/or misrepresentation claim.**

2 Plaintiffs’ fraud, deceit, and/or misrepresentation claim fails because they do not allege
3 “knowledge of falsity (or scienter)” or an “intent to defraud.” *Neilson v. Union Bank of Cal., N.A.*,
4 290 F. Supp. 2d 1101, 1140–41 (C.D. Cal. 2003). Conclusory allegations that Defendants had
5 actual knowledge or deliberately disregarded that the “100% Recyclable” statements were false are
6 not enough under Rule 9(b). CAC ¶ 126; *Ketab Corp. v. Mesriani L. Grp.*, 2015 WL 2085523, at
7 *5 (C.D. Cal. May 5, 2015). And as explained, *supra* Section V.B–D, the CAC fails to plead
8 anything specific about any of the particular products at issue or what role each individual
9 Defendant allegedly had in the undefined “fraud.”

10 **2. UCL claim.**

11 *Failure to Allege Violation of California Recycling Policy.* Plaintiffs allege that
12 Defendants have and continue to engage in unfair and unlawful practices that “violate” California
13 recycling policy—specifically, California Public Resources Code sections 42355 and 42355.5.
14 CAC ¶ 146(c). But these provisions were enacted on January 1, 2022, long after Plaintiffs allegedly
15 purchased the products at issue. Thus, any alleged “violation” of these provisions could not have
16 caused Plaintiffs’ loss of money or property, leaving Plaintiffs without standing to sue on this basis
17 in the wake of Proposition 64. Cal. Bus. & Prof. Code § 17204; *Kwikset Corp. v. Superior Court*,
18 51 Cal. 4th 310, 320–21 (2011). Plaintiffs cite to no authority—and Defendants are aware of
19 none—that legislative findings and declarations can be “violated” such that they can underpin a
20 UCL “unlawful” prong claim.⁸ *See Malmen v. World Sav. Inc.*, 2011 WL 65781, at *4 (C.D. Cal.
21 Jan. 7, 2011) (dismissing plaintiff’s cause of action based on legislative findings and declarations
22 because such “impose[d] no duties on [entities such as defendants] and therefore [was] not the basis
23

24 _____
25 ⁸ Plaintiffs also assert that “contravening and undermining” these findings and declarations, as well
26 as other state and local recycling policies, violates the “unfair” prong of the UCL. CAC ¶ 146(c)–
27 (d). The CAC does not attempt to allege or explain how undermining legislative findings and
28 declarations, even if proven, would meet any of the applicable tests under the UCL’s unfair prong.
See Cel-Tech Commc’ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 184, 186–87
(1999); *Lozano v. AT&T Wireless Servs., Inc.*, 504 F.3d 718, 735–36 (9th Cir. 2007).

1 for a legal claim”); *see also* *Edelman v. Bank of Am.*, 2009 WL 10673209, at *4 (C.D. Cal. Oct. 21,
2 2009) (similar).

3 ***Failure to Allege EMCA Violation.*** Plaintiffs’ UCL claim predicated on an alleged EMCA
4 violation fails because Plaintiffs’ admissions that Defendants’ packaging can be separated from the
5 waste stream meets the Green Guides’ definition of “recyclable”—meaning the EMCA’s safe
6 harbor applies. Cal. Bus. & Prof. Code § 17580.5(b). Defendants accurately describe their
7 products as “100% Recyclable” for reasons expressed *supra* Section V.A–D. The Greenpeace
8 report Plaintiffs cite found that all MRFs accept PET and HDPE—materials that Plaintiffs allege
9 comprise Defendants’ bottles—and that those materials can “be [l]abeled as ‘Recyclable’ per FTC
10 Green Guides.” *See supra* note 5 at 10. As the CAC admits, PET and HDPE are the “most
11 recyclable” plastics. CAC ¶ 42. The CAC also admits that MRFs are widely available in California
12 and that MRFs collect and separate from the waste stream all three types of plastics allegedly used
13 in Defendants’ packaging: PET, HDPE, and PP. *Id.* ¶ 41.

14 ***No Violation of Section 260.3.*** Plaintiffs’ allegations also render implausible their
15 suggestion that Defendants are engaged in unlawful practices by violating Section 260.3 of the
16 Green Guides, which addresses whether an environmental marketing statement refers to the
17 “product, the product’s packaging, a service, or just to a portion of the product, package, or service.”
18 CAC ¶ 51. Not only are all parts of Defendants’ bottles recyclable, but the Green Guides also allow
19 Defendants to label their products as “recyclable” even if “minor, incidental” components like
20 bottle caps or labels are not recyclable. *See* 16 C.F.R. § 260.3(b) (“In general, if the environmental
21 attribute applies to all but minor, incidental components of a product or package, the marketer need
22 not qualify the claim to identify that fact.”). While Plaintiffs assert that Defendants’ bottle caps
23 and labels are not “incidental components” and are not recyclable (a legal conclusion the Court
24 need not accept as true, *Twombly*, 550 U.S. at 555), the Green Guides and Plaintiffs’ allegations
25 contradict both claims. Plaintiffs acknowledge that the plastics used to make Defendants’ bottle
26 caps and labels are recyclable, albeit with further “processing.” CAC ¶ 43. And the Green Guides
27 cite bottle caps as an example of a “minor, incidental component.” 16 C.F.R. § 260.3(b) (“Example
28

1 2: A soft drink bottle is labeled ‘recycled.’ The bottle is made entirely from recycled materials, but
 2 the bottle cap is not. Because the bottle cap is a minor, incidental component of the package, the
 3 claim is not deceptive.”).

4 ***Derivative Claims Subject to Dismissal.*** Where a “UCL claim is derivative of the other
 5 claims in the [complaint] that the Court dismisses . . . [the] derivative UCL claim must also be
 6 dismissed.” *Arena Rest. & Lounge LLC v. S. Glazer’s Wine & Spirits, LLC*, 2018 WL 1805516, at
 7 *13 (N.D. Cal. Apr. 16, 2018). Plaintiffs derive their “unlawful” claim in part from purported
 8 violations of the CLRA and FAL, and it fails for the same reasons. CAC ¶ 147.

9 Because Plaintiffs have failed to allege any plausible basis for their UCL claim—under the
 10 deceptive, unfair, or unlawful prongs—the claim should be dismissed in its entirety.

11 **F. The Consumer Plaintiffs lack Article III standing to pursue their claims.**

12 Plaintiffs Muto, Salgado, and Swartz lack standing to pursue their “100% Recyclable”
 13 claims.⁹ To pursue a claim in federal court, Plaintiffs must demonstrate standing to sue by
 14 establishing that they have “(1) suffered an injury in fact, (2) that is fairly traceable to the challenged
 15 conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision.”
 16 *Spokeo, Inc. v. Robins*, 578 U.S. 330, 338 (2016); *see also Lujan v. Defs. of Wildlife*, 504 U.S. 555,
 17 560 (1992). Plaintiffs “must clearly . . . allege facts demonstrating each element.” *Spokeo*, 578
 18 U.S. at 338 (quoting *Warth v. Seldin*, 422 U.S. 490, 518 (1975)); *see also TransUnion LLC v.*
 19 *Ramirez*, 141 S. Ct. 2190, 2200 (2021) (“To have Article III standing to sue in federal court,
 20 plaintiffs must demonstrate, among other things, that they suffered a concrete harm.”). Here,
 21 Plaintiffs cannot demonstrate even that first, crucial element of injury in fact, so they lack standing.
 22 Even if Plaintiffs’ claims were predicated on a reasonable interpretation of “100% Recyclable,”
 23 they would lack standing to pursue them because they cannot show that the water bottles they
 24 purchased were not recycled. Moreover, because Plaintiffs do not plausibly allege any risk of future
 25 injury, they lack standing to pursue injunctive relief.

26 _____
 27 ⁹ Plaintiff Sierra Club’s lack of Article III standing is addressed in the supplemental brief of Coca-
 28 Cola and BTB.

1 **1. Plaintiffs do not allege that the “100% Recyclable” statement caused**
2 **them any injury.**

3 Though Plaintiffs suggest that water bottles are not generally recycled, they do not allege
4 that the bottles *they* purchased were not ultimately recycled. This renders their alleged injury a
5 hypothetical one at best. Article III standing requires Plaintiffs to show that “they suffered a distinct
6 and palpable injury as a result of the alleged unlawful or unfair conduct.” *Birdsong v. Apple, Inc.*,
7 590 F.3d 955, 960 (9th Cir. 2009). “The requisite injury must be an invasion of a legally protected
8 interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or
9 hypothetical.” *Id.*

10 Plaintiffs acknowledge that Defendants’ bottles are made of the “most recyclable” plastics
11 available. CAC ¶ 42. Plaintiffs make no allegations regarding the recycling rates for plastic water
12 bottles, as opposed to all PET and HDPE products. Plaintiffs wholly fail to address recycling of
13 water bottles in California (or its CRV program), other than to concede that 75 of the nation’s 365
14 MRFs operate in the state. Plaintiffs do not, and cannot, allege that their water bottles were not
15 recycled—meaning that there is no evidence that Plaintiffs received anything less than that for
16 which they paid. Mere supposition that the bottles they purchased might not have been recycled is
17 too “conjectural [and] hypothetical” to give rise to Article III standing. *Birdsong*, 590 F.3d at 960.

18 Courts have consistently declined to entertain false-labeling claims by plaintiffs who might
19 have been, but were not necessarily, deprived of the benefit of their bargain. In *Wallace v. ConAgra*
20 *Foods, Inc.*, 747 F.3d 1025, 1027 (8th Cir. 2014), the plaintiffs complained that they had purchased
21 the defendant’s “100% kosher” hot dogs and later learned that some of the defendant’s products
22 were tainted with non-kosher meat. The court dismissed the complaint for lack of Article III
23 standing, reasoning that it was “pure speculation to say the particular packages sold to the [plaintiffs]
24 were tainted by non-kosher beef,” and “quite plausible” that plaintiffs purchased “*exactly what was*
25 *promised*: a higher quality, kosher meat product.” *Id.* at 1031. Similarly, the court in *Phan v.*
26 *Sargento Foods, Inc.*, 2021 WL 2224260, at *4 (N.D. Cal. June 2, 2021), found that the plaintiff
27 lacked standing to bring suit over a “No Antibiotics” label on a cheese product, where the plaintiff

1 contended that a “systemic problem” at the defendant’s plant had tainted some units with antibiotics.
2 Absent an allegation that the plaintiff “actually purchased one of the[] [p]roducts containing
3 antibiotics,” the plaintiff could not demonstrate that he had suffered any injury from purchasing the
4 product. *Id.*; see also *Pels v. Keurig Dr. Pepper, Inc.*, 2019 WL 5813422, at *4–5 (N.D. Cal. Nov.
5 7, 2019) (dismissing claims for failure to plead a particularized injury where plaintiff did not allege
6 that he himself purchased water with dangerous arsenic levels); *Myers-Armstrong v. Actavis*
7 *Totowa, LLC*, 2009 WL 1082026, at *3–4 (N.D. Cal. Apr. 22, 2009) (allegation that defendant’s
8 products “came from a source of uncertain quality” not sufficient to confer standing).

9 The result must be the same here. As in *Wallace*, it is “quite plausible” that Plaintiffs got
10 exactly what they hoped for: water bottles that were ultimately repurposed for reuse in another
11 product. Their contention to the contrary is “entirely speculative.” Even if Plaintiffs could satisfy
12 Article III by showing that their bottles *probably* were not reused, their allegations still would not
13 suffice. The Greenpeace report Plaintiffs rely on refers to nationwide shortfalls in PET waste
14 recycling capacity in 2017. It also does not address recycling of water bottles in California or under
15 California’s CRV program. Nor does it address recycling at the time Plaintiffs allegedly placed
16 their bottles in the recycling stream in 2020 and 2021. Accordingly, Plaintiffs lack standing to
17 pursue their claims based upon their implausible interpretation of “100% Recyclable.”

18 2. Plaintiffs lack standing to pursue injunctive relief.

19 To establish standing to seek injunctive relief, a plaintiff must show that the threat of future
20 injury is “actual and imminent, not conjectural or hypothetical.” *Davidson v. Kimberly-Clark Corp.*,
21 889 F.3d 956, 967 (9th Cir. 2018) (quoting *Summers v. Earth Island Inst.*, 555 U.S. 488, 493 (2009)).
22 “In other words, the ‘threatened injury must be *certainly impending* to constitute injury in fact’ and
23 ‘allegations of *possible* future injury are not sufficient.’” *Id.* (quoting *Clapper v. Amnesty Int’l USA*,
24 568 U.S. 398, 409 (2013)). “Where standing is premised entirely on the threat of repeated injury,
25 a plaintiff must show ‘a sufficient likelihood that he will again be wronged in a similar way.’” *Id.*
26 (quoting *City of Los Angeles v. Lyons*, 461 U.S. 95, 111 (1983)).

27 The Ninth Circuit, in *Davidson*, rejected the argument “that injunctive relief is *never*

1 available for a consumer who learns after purchasing a product that the label is false.” 889 F.3d at
2 970. But the court did not hold that injunctive relief is always available to a plaintiff who alleges
3 an interest in purchasing the product at issue in the future. Rather, the Ninth Circuit held that “a
4 previously deceived consumer *may* have standing to seek an injunction against false advertising or
5 labeling, even though the consumer now knows or suspects that the advertising was false at the
6 time of the original purchase,” in limited circumstances. *Id.* at 969. The court held that standing
7 to seek injunctive relief *could* exist if a plaintiff made “*plausible* allegations that she will be unable
8 to rely on the product’s advertising or labeling in the future, and so will not purchase the product
9 although she would like to,” or if a plaintiff made “*plausible* allegations that she might purchase
10 the product in the future, despite the fact it was once marred by false advertising or labeling, as she
11 may reasonably, but incorrectly, assume the product was improved.” *Id.* at 969–70.

12 Plaintiffs say they “continue to desire to purchase water in bottles that are ‘100%
13 Recyclable,’” hypothesize that either recycling technology or the products in question could change
14 over time, and make the conclusory assertion that they are “likely to be repeatedly misled by
15 Defendants’ conduct” in the absence of an injunction. CAC ¶ 90. Plaintiffs’ own allegations in the
16 CAC, however, render this assertion implausible. Plaintiffs make clear their belief that now and in
17 the foreseeable future no PET water bottle—an certainly *no* PET water bottle with a HDPE or PP
18 cap and a PP label—is 100% recyclable; the gravamen of their CAC, after all, is that it is a “fiction
19 that plastic bottles are ‘100% Recyclable,’” *id.* ¶ 58, and that PET water bottles are inherently non-
20 recyclable because “the United States lacks the capacity to process 77.5% of all PET and 88% of
21 all HDPE plastic waste generated,” *id.* ¶ 42. Plaintiffs’ allegations regarding the state of recycling,
22 moreover, make it clear that any hypothetical changes to the state of recycling in the United States
23 that might bear on the recyclability of water bottles will be far in the future and that, as persons
24 apparently quite knowledgeable about recycling, they would know if future changes in recycling
25 infrastructure rendered plastic water bottles 100% Recyclable by their definition. Plaintiffs
26 therefore lack standing to seek injunctive relief. *See, e.g., Hanscom v. Reynolds Consumer Prods.*
27 *LLC*, 2022 WL 591466, *4–5 (N.D. Cal. Jan. 21, 2022) (plaintiff lacked standing to pursue

1 injunctive relief because her alleged interest in future purchases of recycling bags was undermined
2 by allegations that recycling processes were “designed to work without such bags”).

3 **G. Plaintiffs’ claims do not warrant joinder.**

4 Finally, while the Court has ruled on the issue, Defendants respectfully wish to preserve
5 their argument that Plaintiffs have failed to meet the requirements for joinder under Federal Rule
6 of Civil Procedure 20. The CAC does not adequately allege that Defendants are jointly or severally
7 liable for one another’s conduct. Rather, it attempts to tie Defendants together by asserting that
8 Defendants’ separate use of the phrase “100% Recyclable” reflects a “coordinated marketing
9 campaign.” *See, e.g.,* CAC ¶ 4. The CAC, however, fails to allege that Defendants actually
10 communicated with one another or otherwise cooperated in making their claims of
11 recyclability. Allegations that Defendants merely engaged in similar conduct do not satisfy Rule
12 20’s joinder requirements. *See, e.g., Robbins v. Gerber Prods. Co.*, 2021 WL 3284812, at *2 (C.D.
13 Cal. June 16, 2021). As such, there is no basis to join Defendants together in a single action, and
14 the claims against the three Defendants should have been severed. *See* Fed. R. Civ. P. 21.

15 **VI. CONCLUSION**

16 For the foregoing reasons, the Court should grant Defendants’ consolidated motion to
17 dismiss with prejudice.
