IN THE UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA CIRCUIT

WESTAR ENERGY, INC.)
Petitioner,))) No. 15-1377
V.) (Consolidated, Lead Case) No. 15-1363)
UNITED STATES ENVIRONMENTAL)
PROTECTION AGENCY, and)
GINA MCCARTHY, Administrator,)
United States Environmental Protection)
Agency)
Respondents.))

<u>PETITIONER WESTAR ENERGY, INC.,'S PRELIMINARY AND</u> <u>NONBINDING STATEMENT OF ISSUES</u>

Pursuant to the Court's orders of October 29, 2015, ECF No. 1580895, and November 30, 2015, ECF No. 1585786, Petitioner Westar Energy, Inc. ("Westar"), hereby submits this preliminary and nonbinding statement of issues.

 Whether the Environmental Protection Agency ("EPA" or the "agency"), in the final rule entitled "*Carbon Pollution Emission Guidelines for Existing Stationary Sources: Electric Utility Generating Units*," 80 Fed. Reg. 64,661 (Oct. 23, 2015) ("Final Rule"), improperly defined "best system of emission reduction" ("BSER") under Section 111(d) of the Clean Air Act (the "Act") to provide the agency with unfettered authority to restructure the Nation's electricity sector and regulate the Nation's entire electric grid.

- Whether in the Final Rule EPA improperly failed to articulate any definable limit to the agency's purported regulatory authority under Section 111(d) of the Act.
- 3. Whether in the Final Rule EPA improperly interpreted "source" under Section 111(d) of the Act to include owners, grid operators, and combinations of sources, including sources (e.g., renewable generation sources) that are outside the scope of the "stationary source" category defined in Section 111(a) of the Act.
- 4. Whether in the Final Rule EPA improperly failed to set performance rate standards under Section 111(d) of the Act that are based on a system that is "adequately demonstrated" for existing affected electric utility generating units ("EGUs").
- 5. Whether in the Final Rule EPA improperly imposed on Kansas performance standards that are not achievable by Kansas utilizing the "system" identified as EPA's definition of best system of emission reduction.
- 6. Whether EPA acted contrary to Congressional intent by setting standards for existing source EGUs in the Final Rule that are more stringent than the standards EPA is setting for new source EGUs in the final rule entitled

- 7. Whether EPA's Final Rule is unlawful as a threshold matter because it engages in regulatory activities that Congress has preserved as the exclusive province of state public utility commissions.
- 8. Whether the Final Rule's "state measures" state plan type option unlawfully purports to allow EPA to adopt state law measures that apply to entities other than affected EGUs -- and thus are outside the scope of the Act -- as federal law.
- 9. Whether the Final Rule's "leakage" requirement for mass-based state plans is unlawful because it increases the stringency of the standards and attempts to regulate the operation of non-affected EGUs and makes mass-based programs more stringent than rate-based plans.
- 10. Whether EPA's decision in the Final Rule to exclude all existing hydro and nuclear generation and to not credit wind and solar renewable energy generation sources or nuclear uprates constructed before 2013 for compliance under rate-based plans is arbitrary and capricious.
- 11. Whether EPA contravened the Clean Air Act and the Administrative Procedure Act by failing to provide adequate notice of and opportunity to

comment on the requirement that mass-based state plans must address "leakage" to non-affected EGUs.

- 12. Whether EPA contravened the Clean Air Act and Administrative Procedure Act by failing to provide adequate notice and opportunity to comment on the methodology for determining "equivalence" between the mass- and ratebased performance standards.
- 13. Whether EPA exceeded its authority under Section 111(d) of the Act by regulating EGUs that undergo a modification that results in an hourly increase in carbon dioxide emissions of 10 percent or less.
- 14. Whether EPA contravened the Clean Air Act and Administrative Procedure Act by failing to provide adequate notice and opportunity to comment on the mass-based goal for the state of Kansas.

Westar reserves its right to modify or supplement this statement of issues, as well as to address these and other issues in more detail in future pleadings.

December 18, 2015

Respectfully submitted,

/s/ William M. Bumpers William M. Bumpers Megan H. Berge Baker Botts L.L.P. 1299 Pennsylvania Ave., NW Washington, DC 20004
