8 Attorneys for Plaintiff  
JOHN STOSSEL

9 **UNITED STATES DISTRICT COURT**  
10 **NORTHERN DISTRICT OF CALIFORNIA**  
11 **SAN JOSE DIVISION**

12 JOHN STOSSEL, an individual,

13 Plaintiff v.

14 FACEBOOK, INC., a Delaware  
15 corporation; SCIENCE FEEDBACK, a  
16 French non-profit organization; and  
17 CLIMATE FEEDBACK, a French non-  
18 profit organization,

19 Defendants.

Case Number:

**COMPLAINT FOR DEFAMATION**

**JURY TRIAL DEMANDED**

1 Plaintiff John Stossel (“Stossel”) by and through his undersigned attorneys, for his Complaint  
2 against Facebook, Inc., (“Facebook”) Science Feedback, and Climate Feedback (collectively,  
3 “Defendants”), alleges as follows:

4 **INTRODUCTION**

5 1. This case presents a simple question: do Facebook and its vendors defame a user who  
6 posts factually accurate content, when they publicly announce that the content failed a “fact-check” and  
7 is “partly false,” and by attributing to the user a false claim that he never made? The answer, of course,  
8 is yes.

9 2. Facebook’s CEO has famously acknowledged to Congress that “[w]e do not want to  
10 become the arbiters of truth.”

11 3. Yet Facebook and its “fact-check” vendors are currently serving as judge, jury, and  
12 executioner regarding whether users are on the “right” or “wrong” side of a complex scientific debate.  
13 And when user content challenges the scientific opinions with which Defendants agree, Defendants use  
14 the pretext of a “fact-check” to affix disparaging labels to the content, or to expressly mischaracterize  
15 the content, even when Defendants know that none of the facts underlying the content are false.

16 4. This reality is evidenced in the case of Plaintiff John Stossel, an award winning career  
17 journalist with a formerly unblemished reputation for truthful and accurate reporting.

18 5. In the last year, Stossel posted on Facebook two short video reports in which he  
19 interviewed experts in the climate change arena about facts and data that Defendants concede are true.

20 6. Without identifying a single false fact contained in the video reports – and in one  
21 instance, apparently without even bothering to review the video at all – Defendants publicly announced  
22 that Stossel’s reporting had failed a “fact-check.”

23 7. In one video, Defendants falsely attributed to Stossel a claim he *never made*, and on that  
24 basis flagged the content as “misleading” and “missing context,” so that would-be viewers would be  
25 routed to the false attribution statement.

26 8. To the second video, Defendants affixed a “partly false” / “[contains] factual  
27 inaccuracies” label, despite Defendants’ knowledge that the content contained no false facts.

28 9. When Stossel challenged Defendants on their false attribution and labels, Defendants’

1 reviewers explained that the judgment was based on Defendants’ displeasure with the “tone” of Stossel’s  
2 speech, with what it allegedly “implies,” and with the “broader claims” it was exploring – not about *any*  
3 false facts it contained.

4 10. Stossel was given no meaningful avenue to contest these unilateral decisions about the  
5 truth of his journalism. Meanwhile, his viewership plummeted due to both Facebook’s censorship and  
6 the reputational harm caused by the false labels.

7 11. Defendants defamed Stossel, with malice. First, they attributed to Stossel a claim he did  
8 not make, and which caused his viewers to shun him. Defendants made this false attribution recklessly,  
9 before they had even reviewed his video. And even after Stossel brought the issue to Defendants’  
10 attention, Defendants refused to correct their speech, and intentionally left the false attribution online  
11 for anyone to see, where it remains today.

12 12. Then, Defendants falsely labeled Stossel’s second video report as having failed a “fact-  
13 check” and stated that it contained “factual inaccuracies” and was “partly false.” Defendants applied  
14 these labels, knowing full well that Stossel’s content contained not a single false fact, and despite the  
15 concession by Defendants’ own scientist reviewer that no “specific facts” in the report were “wrong.”

16 13. Defendants’ statements are provably false, inherently damaging to Stossel, and were  
17 made either with a reckless disregard for their truth or falsity, or with knowledge of their falsity.

18 14. With this lawsuit, Stossel asks the Court to declare that Defendants are not permitted to  
19 hide behind the masquerade of a “fact-check” to defame him with impunity, and that they must make  
20 him whole for the damage they have maliciously caused by their provably false and disparaging  
21 statements about his reporting.

22 **JURISDICTION AND VENUE**

23 15. This Court has subject matter jurisdiction over the subject matter of this Complaint  
24 pursuant to 28 U.S.C. § 1332(a), because this is a civil action between citizens of different states and  
25 countries, where the amount in controversy exceeds the sum of \$75,000.000, exclusive of interest and  
26 costs. There is complete diversity of citizenship between Plaintiff Stossel (a New York resident),  
27 Facebook (a Delaware corporation with a principal place of business in California), Science Feedback  
28 (a French non-profit organization), and Climate Feedback (a French subsidiary of and/or “d/b/a” for

1 Science Feedback).

2 16. This Court has personal jurisdiction over all Defendants. Facebook has its principal place  
3 of business in this District. Science Feedback and Climate Feedback contract with Facebook to render  
4 services that affect California residents and which have harmed Plaintiff. Science Feedback and Climate  
5 Feedback also employ U.S. and California residents in connection with rendering services to Facebook.  
6 All Defendants thus have sufficient minimum contacts with California and/or have intentionally availed  
7 themselves of significant benefits provided by the State of California, rendering the exercise of  
8 jurisdiction by this Court permissible under traditional notions of fair play and substantial justice.

9 17. Venue is proper in this judicial district under 28 U.S.C. § 1391 because Facebook is  
10 deemed to reside in this District, and a substantial part of the events or omissions giving rise to the claim  
11 occurred in this District.

12 **INTRADISTRICT ASSIGNMENT**

13 18. This Action is properly assigned to the San Jose Division of the Court, as the conduct  
14 giving rise to this dispute occurred in or was directed to Santa Clara County, California. *See* Local  
15 Rule 3-2(e).

16 **PARTIES**

17 19. Plaintiff John Stossel (“Stossel”) is an individual who resides in New York County, New  
18 York.

19 20. Defendant Facebook, Inc. (“Facebook”) is a Delaware corporation with its principal  
20 place of business in Menlo Park, California, county of Santa Clara.

21 21. On information and belief and according to public sources, Defendant Science Feedback  
22 is a non-profit Association Déclarée registered in France, and is the parent organization of Climate  
23 Feedback.

24 22. On information and belief and according to public sources, Defendant Climate Feedback  
25 is a subsidiary of Science Feedback, and is either a French non-profit organization or simply an  
26 alternative business name or “d/b/a” for Science Feedback.

27 //

28 //

**RELEVANT FACTS**

**The Parties**

23. Plaintiff John Stossel is a well-respected, award winning career journalist and reporter. He worked at ABC News for over twenty-five years, including as a correspondent and 20/20 co-anchor. He later became the host of a weekly news show on Fox Business. Mr. Stossel has received nineteen Emmy Awards, five awards from the National Press Club, and is also a four-time published author. Currently, he publishes short weekly news videos on social media, primarily on Facebook, where he has over one million followers.

24. Defendant Facebook is an American multinational technology company based in Menlo Park, California, that provides an online social networking service of the same name. On information and belief, there are currently 2.8 billion individuals worldwide who engage in speech on Facebook’s platform.

25. Defendant Science Feedback is French Association Déclarée. Science Feedback describes itself as a “a worldwide network of scientists sorting fact from fiction in science based media coverage.”<sup>1</sup> On information and belief and according to public sources, Science Feedback is the parent organization of several “fact-checking websites,” including Climate Feedback.

26. On information and belief and according to public sources, Climate Feedback is a subsidiary of Science Feedback, and is either a French non-profit organization or simply an alternative business name or “d/b/a” for Science Feedback. Climate Feedback describes itself as “a worldwide network of scientists sorting fact from fiction in climate change media coverage.”<sup>2</sup> Science Feedback and Climate Feedback are collectively referred to as the “Feedback Defendants,” herein.

27. The Feedback Defendants contract and work with Facebook to “fact-check” content posted by Facebook users. Facebook commissions the fact-checking and applies content, labels, and other information developed by the fact-checking to the speech of its users.

28. The Feedback Defendants employ U.S. and California residents to perform the “fact-checking” work for Facebook. Examples include a Science Feedback Science Editor who, according to

<sup>1</sup> See [Science Feedback – A Scientific Reference to Reliable Information Online](https://sciencefeedback.co), also available at <https://sciencefeedback.co>.

<sup>2</sup> See <https://climatefeedback.org/>.

1 his public LinkedIn account, currently resides in Berkeley, California, and Climate Feedback Science  
 2 Editor Nikki Forrester who, according to her publicly posted materials, currently resides in West  
 3 Virginia.

#### 4 **Defendants’ “Fact-Checking” Process**

5 29. Facebook’s website<sup>3</sup> states its “commit[ment] to fighting the spread of misinformation  
 6 on Facebook,” and represents that the company “work[s] with independent, third-party fact-checking  
 7 organizations” to meet this goal.

8 30. Facebook describes that “[t]he focus of this fact-checking program is identifying and  
 9 addressing **viral misinformation**, particularly clear hoaxes that have no basis in fact. Fact-checking  
 10 partners prioritize provably false claims...” (Emphasis in original), *see* FN 3.

11 31. The website further describes that “[f]act-checking partners do not prioritize claims that  
 12 are inconsequential or consist of minor inaccuracies. Additionally, the program is not meant to interfere  
 13 with individual expression, opinions and debate...” *See* FN 3.

14 32. With respect to the role of fact-checkers, Facebook states: “[f]act-checkers will review  
 15 content, check its facts, and rate its accuracy.” *See* FN 3.

16 33. Facebook defines its “partly false” rating as “[c]ontent has some factual inaccuracies.”<sup>4</sup>  
 17 It lists this definition on multiple pages, further stating that “[c]ontent rated ‘Partly False’ includes some  
 18 factual inaccuracies.”

19 34. With respect to Facebook’s own role in labeling user speech, the company states: “[w]e  
 20 apply a label to content that’s been reviewed by fact-checking partners, so people can read additional  
 21 context. We also notify people before they try to share this content, and people who have shared it in  
 22 the past.” *See* FN 3.

23 35. With respect to the consequences of a “fact-check,” Facebook states: “[o]nce a fact-  
 24 checker rates a piece of information as False, Altered or Partly False, it will appear lower in News Feed,  
 25

26 <sup>3</sup> *See* [Fact-Checking on Facebook | Facebook Business Help Center](https://www.facebook.com/business/help/2593586717571940?id=673052479947730), also available at  
<https://www.facebook.com/business/help/2593586717571940?id=673052479947730>

27 <sup>4</sup> *See* [Rating Options for Fact-Checkers | Facebook Business Help Center](https://www.facebook.com/business/help/341102040382165?id=673052479947730), also available at:  
<https://www.facebook.com/business/help/341102040382165?id=673052479947730>; *see also*  
 28 <https://www.facebook.com/journalismproject/programs/third-party-fact-checking/new-ratings>.

1 be filtered out of Explore on Instagram, and be featured less prominently in Feed and Stories. This  
2 significantly reduces the number of people who see it. We also reject ads with content that has been  
3 rated by fact-checkers.” *See* FN 3.

4 36. Facebook continues: “[p]ages and websites that repeatedly share misinformation rated  
5 False or Altered will have some restrictions, including having their distribution reduced. They may also  
6 have their ability to monetize and advertise removed, and their ability to register as a news Page removed  
7 for a given time period.” *See* FN 3.

### 8 **Stossel’s Fire Video**

9 37. On September 22, 2020, Mr. Stossel published on his Facebook page a short news video  
10 entitled “Government Fueled Fires,” which ran just under five minutes in length (the “Fire Video”).<sup>5</sup>

11 38. In the Fire Video, Mr. Stossel discussed the massive forest fires that were ravaging  
12 California in 2020, and reported on several reasons cited by politicians, scientists, and environmentalists  
13 as the cause of the fires.

14 39. The Fire Video generally explored two causes of forest fires: climate change, and the  
15 buildup of vegetation due to fire suppression stemming from government policy.

16 40. In the Fire Video, Stossel repeatedly acknowledged that climate change plays a role in  
17 forest fires. He cited data from the Western Regional Climate Center and stated that “climate change  
18 has made things worse. California has warmed 3 degrees over 50 years.”

19 41. The Fire Video included news clips of reports about the causes of forest fires published  
20 by the news media, including the Los Angeles Times, the New York Times, Our Daily Planet, ABC 10  
21 News, KPIX 5, CNN News, and the Sacramento Bee. The Fire Video also included quotes from US  
22 Forest Service Ecologist Hugh Safford, and an interview with environmentalist Michael Shellenberger.

23 42. The Fire Video covered some of the sensational media reporting about a so-called  
24 “climate apocalypse,” and explored a scientific hypothesis advanced by Mr. Shellenberger and others –  
25 namely, that while climate change undoubtedly contributes to forest fires, it was not the primary cause  
26 of the 2020 California fires.

27 43. In the Fire Video, Stossel interviewed Mr. Shellenberger, who confirmed that “climate

28 <sup>5</sup> *See* <https://www.facebook.com/watch/?v=743082746536680>.

1 change is real,” but opined that based on his interpretation of the data, climate change was not the  
2 *primary* reason for the 2020 forest fires, and who noted – accurately – that “forests that were well-  
3 managed have survived the megafires.”

4 44. The Fire Video concluded with Stossel stating as follows: “Bad policies were the biggest  
5 cause of this year’s fires, not the slightly warmer climate. And while climate change is a problem,  
6 Shellenberger’s new book explains, it’s not an apocalypse.”

7 **Defendants Falsely Attribute to Stossel a Claim He Didn’t Make**

8 45. Shortly after Stossel published the Fire Video, Facebook placed a label prominently over  
9 or below the Fire Video, stating “Missing Context. Independent fact-checkers say this information could  
10 mislead people,” under which was a button stating “See Why.” A copy of this page is as follows:

1 46. If a viewer clicks on the “See Why” button, the following text box appears:

2  
3  
4  
5  
6  
7  
8  
9  
10 47. If a viewer then clicks on the text box, she is directed to a page on Climate Feedback’s  
11 website (the “Verdict Page”), which states: “Claim – ‘forest fires are caused by poor management. Not  
12 by climate change.’ Verdict: misleading” (the “Claim”):<sup>6</sup>

13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26 <sup>6</sup> For full page, see [Climate change, forest management and several other causes contribute to wildfire severity and total area burned in the western United States – Climate Feedback](https://climatefeedback.org/claimreview/climate-change-forest-management-and-several-other-causes-contribute-to-wildfire-severity-and-total-area-burned-in-the-western-united-states/?fbclid=IwAR3s8qPmSScINCXh9fKFUfKxA1HRF-u07sFpp24fg9UOn8SdVTeQUHzEuGk), also available at <https://climatefeedback.org/claimreview/climate-change-forest-management-and-several-other-causes-contribute-to-wildfire-severity-and-total-area-burned-in-the-western-united-states/?fbclid=IwAR3s8qPmSScINCXh9fKFUfKxA1HRF-u07sFpp24fg9UOn8SdVTeQUHzEuGk>

1 48. A reasonable reader who clicked through the various prompts and read the Verdict Page  
2 would and did understand Defendants to mean that Stossel had made the debunked “Claim” set forth  
3 above.

4 49. In reality, not only is the “Claim” contained nowhere in Stossel’s Fire Video, but the Fire  
5 Video repeatedly confirms the opposite: that climate change *is* one of the causes of forest fires.

6 50. In the Verdict Page’s “Key Take Away” section, Climate Feedback states that “[c]limate  
7 change is not the only factor that affects fire behavior, but it is an important one,” and acknowledges  
8 that “land management practices” also contribute to the severity of wildfires in the western US.

9 51. In other words, the scientific conclusions of Climate Feedback’s “Key Take Away” and  
10 Stossel’s Fire Video are substantively identical: they both assert that climate change and land  
11 management practices are each causes of forest fires.

12 52. Climate Feedback’s and Stossel’s scientific conclusions vary only by degree, regarding  
13 what primacy to place on which cause of the 2020 forest fires. This is a complex topic of scientific  
14 debate.

15 53. Yet, Defendants flagged Stossel’s reporting as failing a “fact-check” and being  
16 “misleading” and “missing context,” based on their *false attribution* to Stossel of the “climate change  
17 doesn’t cause forest fires” claim that he never made.

18 54. Defendants’ false attribution and public condemnation of Stossel’s reporting has led  
19 naturally to Stossel’s viewership feeling duped and betrayed. In response to Defendants’ statements,  
20 Stossel’s long-time viewers have sent him messages calling him “shameful” and asking “what happened  
21 to you!?,” with regards to his impeccable journalism.

22 55. On September 25, 2020, Mr. Stossel received a notification from Facebook regarding his  
23 Fire Video, stating “Content is being seen by fewer people because it was rated Missing Context by an  
24 independent fact-checker.”

25 56. On information and belief, many would-be viewers of the Fire Video chose not to view  
26 it, after reading Defendants’ false statements.

27 57. As a journalist who relies primarily on Facebook to communicate with his audience, the  
28 false statements and the curtailing of his viewership caused immediate and irreparable harm to Stossel’s

1 professional reputation, as well as financial harm.

2 **Defendants Did Not Bother to Review the Fire Video Before They Defamed Stossel**

3 58. Incredibly, and as Stossel later learned, Defendants apparently had *not even bothered to*  
4 *review* his Fire Video before condemning it.

5 59. In the wake of the above events, Stossel made significant efforts to bring to Defendants'  
6 attention the falsity of their statements about the Fire Video, and specifically how the Claim had been  
7 falsely attributed to his content. Stossel first contacted Climate Feedback's editor, Nikki Forrester, who  
8 chose not to respond.

9 60. Stossel then spoke with two of the three scientists who Climate Feedback listed on the  
10 Verdict Page as "reviewers" of the Fire Video, Stefan Doerr and Zeke Hausfather. Both of these  
11 scientists freely conceded that they hadn't reviewed the Fire Video before Climate Feedback condemned  
12 it as advancing a false Claim.<sup>7</sup>

13 61. In Mr. Doerr's interview with Stossel, Mr. Doerr stated "if this is implying that we have  
14 reviewed the video, then this is clearly wrong, there's something wrong with the system." *See* FN 7.

15 62. In Mr. Hausfather's interview with Stossel, after Mr. Hausfather was given the chance  
16 to watch the Fire Video, he was asked whether Climate Feedback's adjudication was fairly applied to  
17 the Fire Video. Mr. Hausfather replied "I don't necessarily think so. **While there are plenty of debates**  
18 **around how much to emphasize forest management versus climate change, your piece clearly**  
19 **discussed that both are at fault here.**" *See* FN 7.

20 63. Thus, Climate Feedback's own scientist reviewers confirmed that the attribution of the  
21 Claim ("forest fires are caused by poor management. Not by climate change") to Stossel's Fire Video  
22 was false.

23 64. Stossel asked the scientists why his Fire Video would have been flagged as failing a  
24 "fact-check," since the fact-check was directed against a Claim that Stossel never made. In response,  
25 Mr. Doerr opined that the video was likely flagged because it contained an interview with Mr.  
26 Shellenberger, an environmentalist who criticizes environmental alarmism, and who had previously

27 \_\_\_\_\_  
28 <sup>7</sup> Stossel published his interviews with these scientists in a YouTube video available at:  
[https://www.youtube.com/watch?v=punjBhQG\\_s](https://www.youtube.com/watch?v=punjBhQG_s).

1 been “fact-checked” by Defendants.

2 65. For his part, Mr. Hausfather conceded that “this issue has become very political, which  
3 is unfortunate.” *See* FN 7.

4 66. The scientists’ comments demonstrate that Defendants’ false statements about Stossel’s  
5 reporting were based on blind assumptions about what the Fire Video *probably said*, simply because it  
6 contained an interview of someone with whose conclusions Defendants had previously disagreed.

7 67. Following these interviews, Stossel’s agent sent a follow-up email to Climate Feedback  
8 editor Nikki Forrester, informing her of Mr. Hausfather’s conclusions and repeating the request that  
9 Defendants’ false attribution and associated false labels be corrected. Ms. Forrester responded this time,  
10 but only to direct Stossel to submit an appeal with Science Feedback.

11 68. Days later, Mr. Hausfather wrote to Stossel to say that, “after talking with Climate  
12 Feedback,” he had changed his mind and now believed that the Fire Video “minimizes the role of  
13 climate.”

14 69. On October 8, 2020, Climate Feedback added to its Verdict Page an “Update” that further  
15 defamed Stossel, this time by falsely accusing him of “misrepresent[ing]...our process.” The Update  
16 was buried in the middle of the Verdict Page, and it linked to a fresh page posted by Climate Feedback,  
17 entitled “Responding to Stossel TV video on our rating process” (the “Response Page”).<sup>8</sup>

18 70. In its Response page, Climate Feedback identified no false facts contained in Stossel’s  
19 report.

20 71. Instead, Climate Feedback defended its false statements about Stossel’s reporting on the  
21 grounds that “viewers did not receive an accurate explanation of the scientific research on the role of  
22 climate change in western US wildfires.” *See* FN 8. In making this sweeping judgment, Climate  
23 Feedback did not explain what an “accurate explanation of the scientific research” would look like, nor  
24 did it identify any factual *inaccuracies* in Stossel’s report about the role of climate change in western  
25 US wildfires.

26 72. This defense highlights a central problem with Defendants’ labelling system: since

27 \_\_\_\_\_  
28 <sup>8</sup> *See* [Responding to Stossel TV video on our rating process – Climate Feedback](https://climatefeedback.org/responding-to-stossel-tv-video-on-our-rating-process/); also available at  
<https://climatefeedback.org/responding-to-stossel-tv-video-on-our-rating-process/>.

1 “missing context” is a description that could theoretically be applied to *any* content – whether five  
 2 minutes or five hundred minutes in length – Defendants use the label to condemn any content that  
 3 expresses an opinion with which Defendants disagree, under the pretext of a “fact-check.”

4 73. The remainder of the Response Page did not even discuss the content of Stossel’s video  
 5 at all, but instead attempted to dig Climate Feedback out of the embarrassing hole its own scientists had  
 6 dug during their interviews with Stossel.

7 74. First, the Response Page blamed Stossel for reaching out directly to Climate Feedback’s  
 8 editor and scientist reviewers about false attribution. Then, Climate Feedback claimed that the two  
 9 scientists Stossel had interviewed “are not involved in our rating of Facebook content, including this  
 10 video” – yet both are clearly listed as “Reviewers” on the Verdict Page:

The screenshot shows the Climate Feedback website interface. At the top, there is a navigation bar with links for 'Article Reviews', 'Claim Reviews', 'Insights', and 'Support us'. Below this is a search bar and social media icons. The main content area features a large article titled 'Climate change, forest management and several other causes contribute to wildfire severity and total area burned in the western United States'. To the right of the article is a 'Stay informed' section with a checkbox for email updates and social media follow buttons. Below the article is a sharing bar with 494 shares and buttons for 'Share' and 'Tweet'. The central focus is a 'CLAIM' card with a 'VERDICT' of 'MISLEADING'. The claim text reads: "Forest fires are caused by poor management. Not by climate change." Below the claim is a 'SOURCE' and a 'DETAILS' section. The 'DETAILS' section contains two paragraphs: one stating that wildfires are influenced by various factors and another stating that scientific studies show clear links between climate change and wildfire conditions. To the right of the claim card is a 'Reviewers' section, which is circled in red in the image. This section lists three reviewers: Daniel Swain (University of California, Los Angeles), Stefan Doerr (Swansea University), and Zeke Hausfather (The Breakthrough Institute). Below the reviewers is an 'Editor' section listing Nikki Forrester (Climate Science Editor).

11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26 75. Incredibly, Climate Feedback also claimed it had no obligation to actually review  
 27 Stossel’s content before publicly disparaging it, stating “it is not necessary to create a separate claim  
 28 review article for each post we rate.”

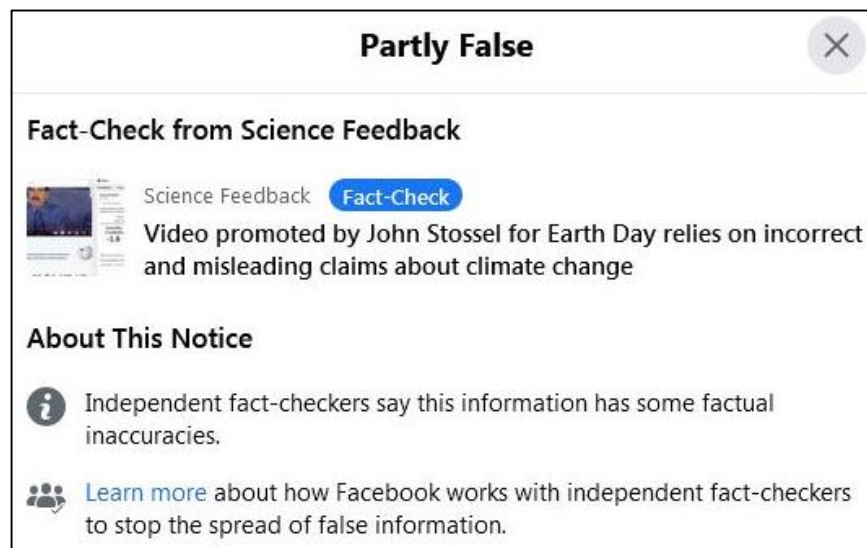

1 no label from Defendants.

2 83. Yet, shortly after the April 2021 re-publication of the Alarmism Video, Facebook placed  
3 a label prominently over the video, stating “Partly False Information. Checked by independent fact-  
4 checkers,” under which was a button stating “See Why,” as follows:

19 84. If a viewer clicked on the “See Why” button, the following text box appears:

1 85. If a viewer then clicks on the text box, she is directed to a page on Climate Feedback’s  
 2 website captioned “[v]ideo promoted by John Stossel for Earth Day relies on incorrect and misleading  
 3 claims about climate change” (the “Fact-Check’ Page”):<sup>10</sup>

4 **Video promoted by John Stossel for Earth Day  
 5 relies on incorrect and misleading claims about  
 6 climate change**

7 Analysis of “Are we doomed?”

8 Published in Stossel TV, by David Legates, John Stossel, Patrick Michaels on 17 Apr. 2021

9 Seven scientists analysed the article and estimate its overall scientific credibility to be ‘very low’.<sup>2</sup>  
 10 A majority of reviewers tagged the article as: Flawed reasoning, Inaccurate, Misleading.

11 

12 The screenshot shows a Facebook post with a video player and an annotation. The annotation is from ScienceFeedback and includes a 'Scientific Credibility' scale. The scale ranges from -2 to +2, with markers for Very high (+2), High (+1), Neutral (0), Low (-1), and Very low (-2). A red arrow points to -1.8, which is labeled 'Very low'. Below the scale, it says 'ClimateFeedback.org' and 'Find more details in Climate Feedback's analysis' with tags for 'misleading', 'Flawed reasoning', and 'Inaccurate'.

13 **SUMMARY**

14 The video was published by John Stossel on YouTube in November 2019 and reposted on Facebook in April  
 15 2021. The video comments on statements made about climate change by environmental activists and  
 16 politicians that can be misleading. However, speakers in the video rely on several inaccurate claims and use  
 17 imprecise language that misleads viewers about the scientific understanding of climate change, according  
 18 to scientists who reviewed the video.

19 For instance, the claim that sea levels have been rising for 20,000 years, made by David Legates, a Professor  
 20 and former assistant secretary of commerce for NOAA nominated by the Trump administration, is imprecise  
 21 and misleading, as it implies sea levels have continued rising since then and current sea level rise is just a  
 22 continuation of past natural fluctuations. But the causes of the global warming event that explains sea level

23 86. Yet the “Fact-Check” Page identified no false facts in Stossel’s report.

24 87. Instead, the very language of the “Fact-Check” Page confirmed that what was being

1 checked was Stossel’s “reasoning” and “overall scientific credibility” – not the underlying facts cited in  
2 his journalism.

3 88. As but one example: in the Alarmism Video, panelist David Legates, Professor of  
4 Climatology at the University of Delaware, stated that “[sea levels have] been rising for approximately  
5 20,000 years.” This fact is accurate, as shown by the very data cited by Climate Feedback on its ‘Fact-  
6 Check’ Page:

17 89. Yet, Climate Feedback concluded that stating this true fact was “imprecise and  
18 misleading, as it **implies** sea levels have continued rising since then and current sea level rise is just a  
19 continuation of past natural fluctuations.” (Emphasis added). *See* FN 10.

20 90. In other words, Defendants’ false labels of Stossel’s reporting were based on **perceived**  
21 **implications** that Defendants drew from the true facts stated in Stossel’s report – not on false facts.

22 91. The reality that facts are not the subject of Defendants’ “fact-checks” was yet again  
23 confirmed by Climate Feedback’s own scientist reviewers – this time, in an interview Stossel conducted  
24 of Patrick Brown, Assistant Professor of San Jose State University, and one of the scientists who  
25 analyzed the Alarmism Video at Climate Feedback’s request.

26 92. In the interview,<sup>11</sup> Stossel expressed his frustration with being labeled as “partly false”

27

28 <sup>11</sup> *See* [The Climate Censors - YouTube](https://www.youtube.com/watch?app=desktop&v=yn1MQjF5gs), also available at  
<https://www.youtube.com/watch?app=desktop&v=yn1MQjF5gs>.

1 for reciting true facts, and asked what was wrong with stating, for example, that there has been no  
2 significant observed trends in hurricane strength over the past century. In response, Brown opined “I  
3 think it’s wrong that you were criticized for saying that. The IPCC [Intergovernmental Panel on Climate  
4 Change], they don’t claim that [hurricanes] are increasing, they don’t claim that droughts are increasing,  
5 they don’t claim that floods are increasing.”

6 93. When Stossel again asked Brown why Defendants had labelled the Alarmism Video  
7 “partly false,” Brown stated “[y]ou get...flagged for downplaying that [climate change is] a problem at  
8 all...**it’s a tonal thing**, I guess.” (Emphasis added). See FN 11.

9 94. Following the interview, Brown emailed Stossel stating that “[t]he problem is the  
10 omission of contextual information **rather than specific ‘facts’ being ‘wrong’.**” (Emphasis added).

11 95. Similarly, one of Climate Feedback’s reviewers told Stossel that “**broader claims are**  
12 **being disputed,**” rather than false facts. (Emphasis added).

13 96. In light of Defendants’ *own definition* of the “partly false” label as content that “includes  
14 some factual inaccuracies,” Defendants defamed Stossel when they stated that his report contained  
15 factual inaccuracies, even though they knew it did not.

16 97. In June 2021, Stossel published a written response to the “Fact-Check” Page (the  
17 “Written Response”<sup>12</sup>) in which he discussed the factual underpinnings for each claim or question raised  
18 in his Alarmism Video. This response noted that “a simple reading of Climate Feedback’s so-called fact  
19 check reveals not a single factual error in our video.”

20 98. As the foregoing facts confirm, Defendants’ “fact-check” process is nothing more than a  
21 pretext used by Defendants to defame users with impunity, particularly when Defendants disagree with  
22 the scientific opinions expressed in user content. Often, the pretext appears to be invoked based on  
23 implicit or explicit viewpoint biases.

24 99. Indeed, the available information suggests that Defendants perform negative “fact-  
25 checks” of content posted by those who opine that climate change is a manageable problem *three times*  
26 *more often* than they perform negative “fact-checks” on climate change alarmists. Moreover,

27 \_\_\_\_\_  
28 <sup>12</sup> See [Climate Feedback’s Misleading Claims - Stossel TV \(johnstossel.com\)](https://www.johnstossel.com/climate-feedback-response/), also available at  
<https://www.johnstossel.com/climate-feedback-response/>.

1 Defendants appear to have labeled Stossel’s Fire Video sight-unseen simply because it contained an  
2 interview of an environmentalist with whose scientific opinions Defendants disagreed.

3 100. On information and belief, many would-be viewers of the Alarmism Video chose not to  
4 view it, after seeing that it had been labeled “Partly False” by Facebook.

5 **Defendants’ False Statements Cause Irreparable Damage**  
6 **to Stossel’s Professional Reputation and Business**

7 101. For the past four years, Stossel’s business model has relied on reaching audiences  
8 through social media platforms, primarily through Facebook.

9 102. Relying on its faulty conclusions about two of Stossel’s video reports, Facebook has  
10 reduced *all* distribution of Stossel’s video reporting, and has limited the number of individuals who will  
11 see his content on Facebook.

12 103. Defendants’ defamation has caused damage to Stossel, including in the form of reduced  
13 distribution of his reporting, reduced viewership, and reduced profits from advertising revenue from  
14 viewership.

15 104. For example, while the Fire Video had nearly 1.2 million views when it was originally  
16 posted, it received almost no views following Defendants’ defamation of the video in September 2020.  
17 This resulted in reduced advertising revenue on that content, which revenue Stossel would otherwise  
18 have received. Moreover, pursuant to Facebook’s policy on flagged content, Stossel was essentially  
19 prohibited from re-posting the Fire Video (which he otherwise would have done, in line with his  
20 standard practice), which would have resulted in another approximately 1.2 million views and the  
21 associated ad revenue from those views.

22 105. Further, immediately after Defendants affixed their false label on the Alarmism Video in  
23 April 2021, there was a dramatic drop in both views of that video and all Stossel’s other videos, and of  
24 the associated advertising revenue, which reduced by nearly half, from approximately \$10,000 a month  
25 to approximately \$5,500 a month, and which Stossel otherwise would have received.

26 106. In addition, Stossel’s professional reputation has been significantly and irreparably  
27 damaged by the false labels and statements that Defendants affixed to his work.

28 //

**Defendants Jointly Developed the Defamatory Statements**

107. All Defendants jointly developed the defamatory content that is at issue in this case.

108. As discussed above, Facebook contracts with the Feedback Defendants to “fact-check” content posted by Facebook users. Facebook was directly involved in developing the defamatory labels and content discussed herein, including by commissioning the Feedback Defendants to review, evaluate, and judge user content, and by affixing the labels directly to user content.

109. The Feedback Defendants acted as Facebook’s agents for the purpose of the “fact-checking” work they perform. The defamatory statements made about Stossel by the Feedback Defendants were made as part of the actual or ostensible agency relationship between the Feedback Defendants and Facebook. Facebook ratified the Feedback Defendants’ defamation of Stossel.

**Defendants Conspired to Publish the Defamatory Statements**

110. Defendants’ false labeling of and false statements about Stossel’s videos was performed as a result of Defendants’ cooperation and agreement with one another.

111. Facebook contracts with the Feedback Defendants for “fact-checking” services, and then adopts their conclusions as the basis for labels Facebook affixes to users’ speech.

112. The Feedback Defendants falsely attributed to Stossel a claim that he did not make in connection with the Fire Video. Based on these conclusions, Facebook affixed “missing context” and “misleading” labels to the Fire Video, and cross-referenced Climate Feedback’s Response Page as support for the label.

113. The Feedback Defendants announced that Stossel’s Alarmism Video was “partly false,” despite no factual inaccuracies. Based on these conclusions, Facebook affixed a “partly false” label to the Alarmism Video and stated that fact-checkers found factual inaccuracies, and cross-referenced Climate Feedback’s “Fact-Check” Page.

114. Defendants were aware of, and agreed with, the plan to publish the false labels and statements about Stossel’s content, and intended that the false labels and statements about Stossel be published. Defendants each took acts to publish the false labels and statements, both on Facebook’s platform and on Feedback Defendants’ website. When they were repeatedly made aware of the falsity of the labels and statements about Stossel, Defendants intentionally left the defamatory content online.

**FIRST CAUSE OF ACTION**  
**Defamation (Libel *Per Se*)**  
**(Cal. Civ. Code §§ 44 *et seq.*)**

1  
2  
3 115. Plaintiff incorporates every allegation contained in each and every one of the above  
4 paragraphs, as though set forth fully herein.

5 116. On or about September 22, 2020, Defendants stated by implication that in Stossel’s Fire  
6 Video, Stossel made a claim (“forest fires are caused by poor management. Not by climate change”) that he did not make (the “False Attribution”). Defendants affixed a “misleading/ missing context” label  
7 to the Fire Video, which routed viewers directly to the False Attribution about Stossel and his reporting.  
8

9 117. The False Attribution was published on the Internet and was not privileged.

10 118. A reasonable reader of the False Attribution, viewing Defendants statements in context,  
11 would and did understand it to mean that Stossel had claimed that climate change is not a cause of forest  
12 fires.

13 119. The False Attribution is provably false. Stossel did not make the claim Defendants  
14 attributed to him. By stark contrast, his Fire Video expressly acknowledged that climate change was one  
15 cause of forest fires.

16 120. No immunities apply to render Defendants’ speech non-actionable. Plaintiff seeks to hold  
17 Facebook responsible for speech that (a) Facebook jointly develops, (b) was published on Facebook’s  
18 behalf by Facebook’s agents, and (c) was published pursuant to a conspiracy to defame Stossel.

19 121. The False Attribution tends directly to injure Stossel in his profession and occupation,  
20 and exposed him to hatred, contempt, ridicule, and/or shame, and discouraged others from associating  
21 or dealing with him. The False Attribution has led Stossel’s viewers to question his credibility, and by  
22 natural consequence, caused actual damage to Stossel, in the form of reduced distribution of his  
23 reporting, reduced viewership, and reduced profits from advertising revenue from viewership. In  
24 addition, the False Attribution has caused Stossel irreparable reputational harm, which is ongoing.

25 122. Defendants acted with malice when they published the False Attribution. Defendants  
26 knew, or should have known, that Stossel had not made the claim attributed to him. Yet Defendants  
27 published the False Attribution with knowledge of its false implication, or with reckless disregard of its  
28 truth – indeed, Defendants apparently did not bother to review the Fire Video before they defamed it.

1 Further, Defendants continued to publish the False Attribution after Stossel repeatedly put Defendants  
2 on notice of its falsity. Defendants also failed to include any explanation or disclaimer adjacent to their  
3 False Attribution, which would have informed readers that Stossel’s reporting did not contain the claim  
4 attributed to it.

5 123. In addition, by blindly adopting the Feedback Defendants’ assessment of the Fire Video  
6 without conducting any independent review or vetting of that assessment, Facebook also acted with  
7 reckless disregard of the truth or falsity of the Fire Video when defaming it.

8 124. In addition to his compensatory and actual damages, Stossel is entitled to recover  
9 punitive damages sufficient to punish Defendants for making the defamatory statements with malice,  
10 fraud, and/or oppression.

11 125. On or about April 17, 2021, Defendants stated that Stossel’s Alarmism Video had been  
12 subjected to a “fact-check” that had determined that the Alarmism Video contained “factual  
13 inaccuracies” and was “partly false” (the “False Statements”).

14 126. These False Statements were published on the Internet and were not privileged.

15 127. A reasonable reader, viewing these False Statements in context, would and did  
16 understand them to mean that Stossel’s reporting contained inaccurate facts, rendering it partly false.

17 128. The False Statements are provably false: the Alarmism Video contains no false facts.

18 129. No immunities apply to render Defendants’ speech non-actionable. Plaintiff seeks to hold  
19 Facebook responsible for (a) speech that Facebook jointly develops, and which was published on  
20 Facebook’s behalf by Facebook’s agents, and which was published pursuant to a conspiracy to defame  
21 Stossel, and (b) speech that Facebook affirmatively publishes on its own platform. *See* FN 3 *supra*  
22 (“Fact-Checking on Facebook” page, stating “**We apply** a label to content that’s been reviewed by fact-  
23 checking partners...” (emphasis added)).

24 130. The False Statements tend directly to injure Stossel in his profession and occupation, and  
25 exposed him to hatred, contempt, ridicule, and/or shame, and discouraged others from associating or  
26 dealing with him. The False Statements, by natural consequence, caused actual damage to Stossel, in  
27 the form of reduced distribution of his reporting, reduced viewership, and reduced profits from  
28 advertising revenue from viewership. In addition, the False Statements have caused Stossel irreparable

1 reputational harm, which is ongoing.

2 131. Defendants acted with malice when they published the False Statements. Defendants  
3 knew, or should have known, that Stossel’s reporting contained no false facts – only scientific opinions  
4 with which Defendants disagreed – yet Defendants publicly declared that the Alarmism Video had failed  
5 a “fact-check,” contained “factual inaccuracies,” and was “partly false.” Further, Defendants continued  
6 to publish their False Statements after Stossel repeatedly put Defendants on notice of their falsity.

7 132. In addition, by blindly adopting the Feedback Defendants’ assessment of the Alarmism  
8 Video as “partly false” without conducting any independent review or vetting of that assessment,  
9 Facebook also acted with reckless disregard of the truth or falsity of the False Statements when making  
10 them.

11 133. In addition to his compensatory and actual damages, Stossel is entitled to recover  
12 punitive damages sufficient to punish Defendants for making the defamatory statements with malice,  
13 fraud, and/or oppression.

**PRAYER FOR RELIEF**

Wherefore, Plaintiff John Stossel respectfully prays for relief and judgment against Defendants Facebook, Science Feedback, and Climate Feedback as follows:

- i. For judgment in favor of Plaintiff and against Defendants;
- ii. For injunctive and declaratory relief requiring Defendants, their officers, agents, servants, employees, and all other persons acting in concert or participation with them, to remove all content found to be defamatory and refrain from re-posting such content;
- iii. For general, special, and compensatory damages in a sum sufficient to make Plaintiff whole for his actual damages and reputational damages, in an amount according to proof at trial but estimated to exceed \$1,000,000;
- iv. For exemplary and punitive damages in a sum sufficient to deter Defendants' conduct, but in an amount no less than \$1,000,000;
- v. For costs of suit herein; and
- vi. For such other and further relief as the Court deems just and proper.

Respectfully submitted,

Date: September 22, 2021
